3. We are dependent on our management team for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our success largely depends on the continued services and performance of our management and other key personnel. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

6. Our lenders have charge on over our movable properties in respect of finance availed by us.

In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders. For further information on the financing and loan agreements along with the total amounts outstanding; please refer to Annexure 9 of section titled “Financial Information of our Company” on page 100 of this Draft Prospectus.

7. We have taken unsecured loan of Rs. 127.05 Lacs as on 30th June, 2013, which is repayable on demand. In case of untimely demand, we will have to arrange these funds which may carry higher cost of funding, which may have an impact on our financial operations.

We have taken unsecured loan of Rs. 127.05 Lacs as on 30th June, 2013 which can be recalled at any time and in that event, it may affect the financial operations of our Company to that extent.

8. Our indebtedness and the conditions and restrictions imposed by our financing arrangements could adversely affect our ability to conduct our business and operations.

We have entered into agreements with certain banks and financial institutions for short-term and long-term borrowings. Some of these agreements contain restrictive covenants, including, but not limited to, requirements that we obtain written consent from lenders prior to issuing new shares, incurring further debt, creating further encumbrances on our assets, effecting any scheme of amalgamation or restructuring, undertaking guarantee obligations, declaring dividends, undertaking new projects or making investments. There can be no assurance that we will be able to comply with these covenants or that we will be able to obtain the consents necessary to take the actions we believe are required to operate and grow our business. Certain of our loans may be called at any time by our lenders pursuant to terms of the relevant agreements. An event of default under any of these loan arrangements, if not cured or waived, could have a material adverse effect on us.

9. Our Company does not have any long term supply contracts with our customers which may adversely affect our results of operations.

Our Company does not have any long term commitments with our customers for purchases of our products. As a result, we may be dependent on the recurring purchase orders received from time to time. There is no assurance that our Company will continue to receive purchase orders for our products either on substantially the same terms or at all, which could have an adverse effect on our Company’s operations and profitability. Further, any change in the buying pattern of our end users can adversely affect the business and results of operations of our Company.

- 10. Raw materials constitute a significant percentage of our Company’ s total expenditure. Any material increase in the prices of raw material or any shortfall in its supply could have a material adverse affect on our Company’ s business and financial condition.**

The Raw materials like HPIS, GPPS, PP, constitute a significant percentage of the total expenditure of our Company. Although the impact of cost of raw materials is entirely passed on to our clients, any increase in the price of these raw materials, which our Company is unable to pass on the impact of, would have a material adverse effect on our Company’s business and financial condition. Further, any material shortage or interruption in the supply of these raw materials due to natural causes or other factors may also adversely affect our Company’s business and financial condition.

- 11. The loss of or shutdown of operations at our manufacturing units could have a material adverse effect on our business, financial condition and results of operations.**

We operate a manufacturing unit to carry out our manufacturing activities. Our plant is subject to operating risks, such as shutdowns due to the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, adequate utilisation rates, obsolescence of equipment, industrial accidents or any other reason and the need to comply with the directives and applicable regulations. Although, we have had no such occurrences in the past and we take precautions to minimize the risk of any significant operational problems at our facilities, the occurrence of any of the aforementioned operating risks could significantly affect our business, financial condition and results of operations.

- 12. Accidents in the existing and proposed assembly line may lead to public liability consequences. Further, our revenue could be diminished if we are associated with negative publicity**

Occurrence of accidents at our plant may expose our Company to pay compensation and penalty to our workmen and third parties for any losses or damage to human life/health or the environment. Further, our revenue could be diminished if we are associated with negative publicity.

- 13. We may not be successful in implementing our business strategies effectively or at all.**

The success of our business will depend greatly on our ability to implement our business strategies effectively. We plan to expand the existing range of our products, increase our client base, explore inorganic growth opportunities and maintain high quality standards. Our ability to execute our business strategy is subject to a variety of risks. Besides, in the event we are unable to execute our business strategy fully or successfully, our development might be hindered. As such, we cannot assure you that we will be able to execute our business strategy successfully or at all, or we will be able to manage our growth effectively, and any failure to do so could have a material adverse effect on our business, prospects, financial condition or results of operations.

- 14. Competition from other domestic producers particularly in the unorganised sector may adversely affect our profitability.**

We face competition from other existing domestic producers and potential entrants to the industry in which we operate that may adversely affect our competitive position and our profitability. Loss of market share and competition may also adversely affect our profitability. We also face competition for customers from other players in the organised and unorganised markets. We expect competition could increase with new entrants coming into this industry and existing players consolidating their positions. Some of our competitors may have access to significantly greater resources and hence our inability to compete more effectively may adversely affect our profitability.

- 15. We are dependent on third party transportation providers for the delivery of raw materials and products. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition and results of operations.**

We use third party transportation providers for the supply of most of our raw materials and for delivery of our products to our customers. Non-availability of adequate means of transport could adversely affect our

receipt of raw materials and the delivery of our products. While, the end consumer bears the freight cost presently, we cannot assure that same arrangements will continue in view of the increase in transport costs. In such an event, our business, financial condition and results of operation may be adversely affected.

- 16. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.**

As per SEBI (ICDR) Regulations, 2009 appointment of monitoring agency is required only for Issue size above Rs. 50,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 17. Delay in raising funds from the IPO could adversely impact the implementation schedule.**

The proposed expansion, as detailed in the section titled "*Objects of the Issue*" is to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

- 18. The Company has not appointed any independent agency for the appraisal of the proposed Project.**

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project expenditure and may have an adverse impact on our business, financial condition and results of operations.

- 19. The Company has not yet placed orders for some of the capital equipments.**

Our Company has identified the equipments/machineries to be acquired but has not yet identified the suppliers or placed orders for these. The estimated cost of acquisition of plant & machinery is as mentioned in chapter "Objects of the Issue" on page 39, and the actual cost of equipments / machineries may differ from the estimated price at the time of actual placement of orders. Since the Company has set up similar facilities in the past, it will have an advantage in identifying and selecting the right supplier at competitive rates.

- 20. We face competition in our business from both domestic and international competitors. Such competition would have an adverse impact on our business and financial performance.**

We operate in a highly competitive environment. Principal products of our Company include disposable plastic glasses, cups. Players in this market generally compete with each other on key attributes such as technical competence, quality of products, pricing and track record. We compete against our competitors on quality, technical competence, distribution channels and customer relationships. There is no assurance that we will continue to compete successfully in future. Some of our competitors may be able to price their products more attractively or may be able to distribute their products more effectively through establishing better distribution networks, or may have greater access to capital, superior research and development, marketing and other resources. Our inability to remain sufficiently competitive will adversely and materially affect our business and operating results. In addition, should there be any significant increase in global competition or if we are unable to meet the requirements of the changing market conditions, our business and operating results could be adversely affected. The occurrence of any of those events could have a material adverse effect on our ability to compete against our competitors, which would have an adverse impact on our business and financial performance.

- 21. Our Insurance coverage may not adequately protect us against certain operating risks and this may have a material adverse impact on our business.**

We have maintained insurance coverage of our assets to the tune of Rs. 267.35 Lacs as specified in section titled Insurance Policies on page 61 of the Draft Prospectus. We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

- 22. Our trademark is not registered under the Trade Marks Act our ability to use the trademark may be impaired.**

Our company's business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not have a registered trademark over our name and logo under the Trade Marks Act and consequently do not enjoy the statutory protections accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection. If our trademarks are not registered it can allow any person to use a deceptively similar mark and market its product which could be similar to the products offered by us. Such infringement will hamper our business as prospective clients may go to such user of mark and our revenues may decrease.

EXTERNAL RISK FACTORS

- 23. Political, economic and social changes in India could adversely affect our business.**

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

- 24. Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.**

The revenues recorded and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

- 25. Natural calamities and force majeure events may have an adverse impact on our business.**

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

- 26. Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.**

Our Company may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, the IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 ("IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has

notified that 32 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. We have not yet determined with certainty what impact the adoption of IFRS will have on our financial reporting. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of IFRS may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period.

27. Restrictions on foreign investment limit our ability to raise debt or capital outside India.

Indian laws constrain our ability to raise capital outside India through the issuance of equity or convertible debt securities and restrict the ability of non-Indian companies to invest in us. Foreign investment in, or an acquisition of, an Indian company requires approval from the relevant government authorities in India, including the Reserve Board of India and the Foreign Investment Promotion Board.

28. Any downgrading of India's debt rating by a domestic or international rating agency could negatively impact our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

29. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may adversely affect the Indian markets on which our Equity Shares will trade. These acts may result in a loss of business confidence, make travel and other services more difficult and have other consequences that could have an adverse effect on our business. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of our Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our Equity Shares.

30. Third party statistical and financial data in this Draft Prospectus may be incomplete or unreliable.

We have not independently verified any of the data from industry publications and other sources referenced in this Draft Prospectus and therefore cannot assure you that they are complete or reliable. Discussions of matters relating to India, its economies or the industries in which we operate in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

RISKS RELATING TO THE EQUITY SHARES

31. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

32. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

33. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

Prior to the offer, there has been no public market for our Equity Shares, and an active trading market on the SME Platform of BSE. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the fire fighting industry, crushing industry, developments relating to India and volatility in the Exchange and securities markets elsewhere in the world. However, the LM will arrange for compulsory market making for a period of 3 years from the date of listing as per the regulations applicable to the SME Platforms under SEBI (ICDR) Regulations, 2009.

34. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

35. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Guinness Securities Limited is acting as Designated Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the section titled "*General Information - Details of the Market Making Arrangement for this Issue*" on page 27 of this Draft Prospectus.

36. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker

operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

INDUSTRY OVERVIEW

This makes India the fifth largest economy in the world after the European Union, the United States of America, China and Japan in PPP terms, (Source: CIA World Factbook). Manufacturing is the production of goods for use or sale using labor and machines, tools, chemical and biological processing, or formulation. The term may refer to a range of human activity, from handicraft to high tech, but is most commonly applied to industrial production, in which raw materials are transformed into finished goods on a large scale. Such finished goods may be used for manufacturing other, more complex products, such as aircraft, household appliances or automobiles, or sold to wholesalers, who in turn sell them to retailers, who then sell them to end users - the "consumers".

Manufacturing takes turns under all types of economic systems. In a free market economy, manufacturing is usually directed toward the mass production of products for sale to consumers at a profit. In a collectivist economy, manufacturing is more frequently directed by the state to supply a centrally planned economy. In mixed market economies, manufacturing occurs under some degree of government regulation.

DISPOSABLE PRODUCTS

A disposable is a product designed for cheapness and short-term convenience rather than medium to long-term durability, with most products only intended for single use. The term is also sometimes used for products that may last several months to distinguish from similar products that last indefinitely. The disposable products include kitchen & dining products like disposable dishware, plastic cutlery, cans, bottles, cups, plates, glasses etc.

medical & hygiene products such as toilet paper, plastic syringes, blood bags, paper napkins, facial paper & toilet rolls, baby and adult diapers etc. Plastic disposable packaging material is widely used in hotels and catering Industries.

With India rising, the outlook of Indians is changing too. Consumer spending India on personal care products is very less. Further, the penetration levels are low too. With growing urbanization and higher disposable incomes, consumers are now spending higher on personal care products. Higher growth will be seen in premium range of such products. While rural areas will drive the growth of mass consumption products, urban consumers will be targeted for the premium segments. The shift from unorganized to organized and from unbranded to brand will add further impetus to growth in this segment. India's immense population of one billion-plus people offers tremendous market potential. Outlining the growth areas for this segment, disposable paper shopping bags, sanitary napkins, diapers, wipes, kitchen dishware, glasses, cups etc. will be the key drivers of growth. The presence of major players in this field will carve out niche for India in exports as well.

In modern era of fast food industry, there is a thirst of disposable utensil such as glass, cups, bowls etc which are rapidly replacing conventional utensils. These disposable plastic utensils are fast replacing conventional glasses, cups etc.

These disposable plastic utensils are manufactured by thermoforming technique and are increasingly used in Ice-cream industry, hotels, restaurants, canteens, etc. against conventional glass-wares or ceramic cups. Our manufactured disposable cups, glasses are mainly used for food items and are made out of polypropylene or polystyrene sheets.

Polypropylene Sheets

The polystyrene sheets have thickness of 0.25 mm to 0.75 mm are used for disposable plastic utensils in thermoforming machine. Our disposable products are gaining popularity due to attractive look, low weight for container, ease of transportation and low impermeability. Organizations like Railways, Airlines are using disposable cups for serving coffee, tea etc. now-a-days.

The Indian Economy

India is the world's largest democracy in terms of population with Gross Domestic Production (GDP) of US\$ 4,060 billion in 2010 in purchasing power parity (PPP) terms. This makes India the fifth largest economy in the world after the European Union, the United States of America, China and Japan in PPP terms, (Source: CIA World Factbook). India is also amongst the fastest growing economies globally and its real GDP has grown at an average compounded rate of 8.4% per annum during the last five years up to FY 2011. (Source- Central Statistics Office, Government of India)

India is developing into an open-market economy, yet traces of its past autarkic policies remain. Economic liberalization, including industrial deregulation, privatization of state-owned enterprises, and reduced controls on foreign trade and investment, began in the early 1990s and has served to accelerate the country's growth, which has averaged more than 7% per year since 1997. India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly more than half of the work force is in agriculture, but services are the major source of economic growth, accounting for more than half of India's output, with only one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services and software workers. In 2010, the Indian economy rebounded robustly from the global financial crisis - in large part because of strong domestic demand - and growth exceeded 8% year-on-year in real terms. Merchandise exports, which account for about 15% of GDP, returned to pre-financial crisis levels. An industrial expansion and high food prices, resulting from the combined effects of the weak 2009 monsoon and inefficiencies in the government's food distribution system, fueled inflation which peaked at about 11% in the first half of 2010, but has gradually decreased to single digits following a series of central bank interest rate hikes. In 2010 government reduced subsidies for fuel and fertilizers, sold a small percentage of its shares in some state-owned enterprises and auctioned off rights to radio bandwidth for 3G telecommunications in part to lower the government's deficit. The Indian Government seeks to hold its budget deficit to 5.5% of GDP in FY 2010-11, down from 6.8% in the previous fiscal year. India's long term challenges include widespread poverty, inadequate physical and social infrastructure, limited non-agricultural employment opportunities, insufficient access to quality basic and higher education, and accommodating rural-to-urban migration.

Manufacturing

Manufacturing is the production of goods for use or sale using labor and machines, tools, chemical and biological processing, or formulation. The term may refer to a range of human activity, from handicraft to high tech, but is most commonly applied to industrial production, in which raw materials are transformed into finished goods on a large scale. Such finished goods may be used for manufacturing other, more complex products, such as aircraft, household appliances or automobiles, or sold to wholesalers, who in turn sell them to retailers, who then sell them to end users - the "consumers".

Manufacturing takes turns under all types of economic systems. In a free market economy, manufacturing is usually directed toward the mass production of products for sale to consumers at a profit. In a collectivist economy, manufacturing is more frequently directed by the state to supply a centrally planned economy. In mixed market economies, manufacturing occurs under some degree of government regulation.

Modern manufacturing includes all intermediate processes required for the production and integration of a product's components. Some industries, such as semiconductor and steel manufacturers use the term fabrication instead.

PLASTIC INDUSTRY IN INDIA:

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made and the industry has grown and diversified rapidly. Currently, the Indian plastics industry is spread across the country, employing about 4 million people and over 2,000 exporters. It operates more than 30,000 processing units, of which 85 per cent to 90 per cent are small and medium enterprises (SMEs). India is one of the most promising exporters of plastics among developing countries. The Indian plastics industry produces and exports a wide range of raw materials, plastic moulded extruded goods, polyester films, laminates, moulded/ soft luggage items, writing instruments, plastic woven sacks and bags, PVC leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory/ medical surgical ware and travel ware, among other products.

In 2011-12, exports of Indian plastics stood at US\$ 7.19 billion, registering a growth of approximately 47 per cent over the previous year. Indian plastics exports have grown at a rate of 19.9 per cent since 2007-08. Products from the Indian plastics industry are exported to more than 150 countries ;major trading partners being China, the US, the UAE, Turkey, Italy, the UK, Indonesia, Germany, Vietnam, Bangladesh, Nigeria, Pakistan, South Africa, Brazil, Singapore, Saudi Arabia, Nepal, Egypt, Sri Lanka and the Netherlands. *Sources India Brand Equity Foundation(IBEf).*

DISPOSABLE PRODUCTS

Disposable products are designed for cheapness and short-term convenience rather than medium to long-term durability, with most products only intended for single use. The term is also sometimes used for products that may last several months to distinguish from similar products that last indefinitely. The disposable products include kitchen & dining products like disposable dishware, plastic cutlery, cans, bottles, cups, plates, glasses etc. medical & hygiene products such as toilet paper, plastic syringes, blood bags, paper napkins, facial paper & toilet rolls, baby and adult diapers etc. Plastic disposable packaging material is widely used in hotels and catering Industries.

With India rising, the outlook of Indians is changing too. Consumer spending India on personal care products is very less. Further, the penetration levels are low too. With growing urbanization and higher disposable incomes, consumers are now spending higher on personal care products. Higher growth will be seen in premium range of such products. While rural areas will drive the growth of mass consumption products, urban consumers will be targeted for the premium segments. The shift from unorganized to organize and from unbranded to brand will add further impetus to growth in this segment. India's immense population of one billion-plus people offers tremendous market potential. Outlining the growth areas for this segment, disposable paper shopping bags, sanitary napkins, diapers, wipes, kitchen dishware, glasses, cups etc. will be the key drivers of growth. The presence of major players in this field will carve out niche for India in exports as well.

BUSINESS OVERVIEW

Our Company was originally incorporated in Kolkata as "Polymac Thermoformers Private Limited" on 17th December, 1999 under the Companies Act, 1956 vide certificate of incorporation issued by the Registrar of Companies, West Bengal. Our Company was converted in to a public limited company and consequently the name was changed to "Polymac Thermoformers Limited" vide fresh certificate of incorporation dated 26th August, 2013 issued by the Registrar of Companies, West Bengal.

Manufacturing of Disposable Plastic Products

We are engaged in the business of manufacturing disposable plastic products such as plastic glasses, cups, bowls. We have been evolved in 1999 and in 2001 we have set up our manufacturing facility which is situated at Dankuni, P.O.-Dankuni Coal Complex, Dist.-Hoogly-712310.

In modern era of fast food industry, there is a thirst of disposable utensil such as glass, cups, bowls etc which are rapidly replacing conventional utensils. These disposable plastic utensils are fast replacing conventional glasses, cups etc.

These disposable plastic utensils are manufactured by thermoforming technique and are increasingly used in Ice-cream industry, hotels, restaurants, canteens, etc. against conventional glass-wares or ceramic cups. Our manufactured disposable cups, glasses are mainly used for food items and are made out of polypropylene or polystyrene sheets.

Polypropylene Sheets

The polystyrene sheets have thickness of 0.25 mm to 0.75 mm are used for disposable plastic utensils in thermoforming machine. Our disposable products are gaining popularity due to attractive look, low weight for container, ease of transportation and low impermeability. Organizations like Railways, Airlines are also using disposable cups for serving coffee, tea etc. now-a-days.

Market Potential

Due to the recent change in the life style of urban class the demand for disposable cups, glasses etc are increasing at a rapid rate. Plastic disposable cups, glasses are used by Ice-cream industry, hotels, restaurants, canteens etc. Major customer of disposable cups is ice-cream industry. The per capita consumption of ice-cream in India is far below compared to the level of consumption in developed countries. However, the Indian Ice-cream industry is going faster and according to an estimate the annual rate of growth of Indian Ice-cream Industry is approximately 20 - 25%. Considering the above factors, demand of disposable cups is expected to increase faster in future. Huge quantity plastic disposable cups are being used during festivals, functions, party, picnic time. Besides organization like Railways, Airlines are using a good quantity of plastic disposable cups and glasses.

Plant Capacity:

We have Annual Production capacity: 380 Tonne based on per day of 8 Hrs single shift for a period of 300 working days.

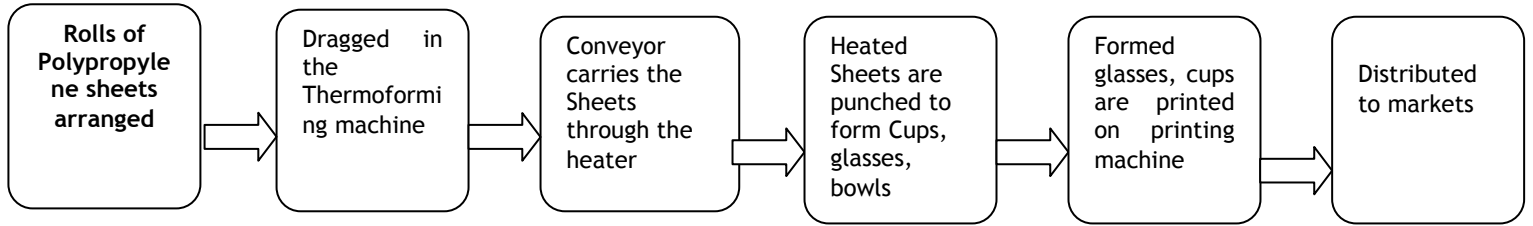

Raw Material:

The main raw material required for manufacturing plastic disposable cups, glasses, bowls is High Impact Polystyrene (HPIS) Granules (50 Tonne per annum), GPPS (250 Tonne per annum), PP (100 Tonne per annum)

Manufacturing Process:

Polypropylene/Polystyrene sheet feeding reels of preset length is dragged from bobbin reel in the thermoforming plant. The conveyor chains carry the sheet through the heater assembly to the forming table. The heated sheet is punched to form the shape of the mould. The cups thus formed are stocked and the punched waster sheet is wound on scrap sheet winder. To get printed cups, the cups are printed on printing machine. Taking 90 ml cup as yard stick machine with 21 cavities mould make approximately 1,92,000 cups (24,000 pcs X 8 hours) per shift. In terms of weight, a 90 ml cup made of 0.3 mm thick High Impact Polystyrene sheet is approximately 1.1 gm. Therefore, the total weight of output of a machine per shift is 211Kg (1,92,000 X 1.1). The average weight of sheet required per cup is 2.0 gms. (which implies wastage of approximately 1.1 gms per cup).

Flow of Manufacturing process:

KEY INDUSTRY REGULATIONS AND POLICIES

The following description is a summary of the relevant regulations and policies as prescribed by the Government of India, Government of West Bengal and the respective bye laws framed by the local bodies in West Bengal, and others incorporated under the laws of India.

The information detailed in this chapter has been obtained from the various legislations and the bye laws of the respective local authorities that are available in the public domain. The regulations and policies set out below are not exhaustive and are only intended to provide general information to the investors and are neither designed nor intended to be a substitute for professional advice.

The Companies Act, 1956

The Act deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all relevant aspects including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

Regulation of Foreign Investment in India

Foreign investment in India is primarily governed by the provisions of the Foreign Exchange Management Act, 1999 (“FEMA”) and the rules and regulations promulgated there under. The RBI, in exercise of its powers under FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 (“FEMA Regulations”) which prohibit, restrict and regulate, transfer or issue of securities, to a person resident outside India. Pursuant to the FEMA Regulations, no prior consent or approval is required from the RBI for foreign direct investment under the “automatic route” within the specified sectoral caps prescribed for various industrial sectors. In respect of all industries not specified under the automatic route, and in respect of investments in excess of the specified sectoral limits under the automatic route, approval for such investment may be required from the FIPB and/or the RBI. Further, FIIs may purchase shares and convertible debentures of an Indian company under the portfolio investment scheme through registered brokers on recognized stock exchanges in India. Regulation 1 (4) of Schedule II of the FEMA Regulations provides that the total holding by each FII or SEBI approved sub-account of an FII shall not exceed 10% of the total paid-up equity capital of an Indian company or 10% of the paid-up value of each series of convertible debentures issued by an Indian company and the total holdings of all FIIs and sub accounts of FIIs added together shall not exceed 24% of the paid-up equity capital or paid-up value of each series of convertible debentures. However, this limit of 24% may be increased up to the statutory ceiling as applicable, by the Indian company concerned passing a resolution by its board of directors followed by the passing of a special resolution to the same effect by its shareholders.

Transfer of Property Act, 1882

The transfer of property is governed by the Transfer of Property Act, 1882 (“T.P. Act”). The T.P.
