Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

- 30. *The Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.***

Upon completion of this Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

B. Risks Related To Our Equity Shares and Equity Share Holders

- 31. *Our Company has not paid dividends in the recent years. There is no guarantee that we will be able to pay dividends in the future.***

Our Company has not paid any dividend (including any interim dividend) on its shares during the preceding 3 financial years. Further, our ability to pay dividends in the future will depend upon a variety of factors, including our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements, if any. As a result, we cannot assure you that we will make dividends of any particular amount, with any particular frequency or at all.

- 32. *Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

33. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

34. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

35. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors;
- d. Adverse media reports on the Company or pertaining to the Industry in which we operate;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies;

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

36. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by book build method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 61 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and

- Domestic and international economic, legal and regulatory factors unrelated to our performance.

37. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the New Companies Act, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

38. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. For more details, please refer to "*Statement of Tax Benefits*" on page 61 of this Draft Prospectus.

External Risk Factors

39. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The following external risks may have an adverse impact on our business and results of operations should any of them materialize:

- A change in the central or state government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular;
- High rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins; and
- A slowdown in economic growth or financial instability in India could adversely affect our business and results of operations.
- Civil unrest, acts of violence, terrorists attacks, regional conflicts or situations or war involving India or other countries could materially and adversely affect the financial markets which could impact our business. Such incidents could impact economic growth or create a perception that investment in Indian companies could involve higher degree in risk which could reduce the value of the equity shares.
- National disasters in India may disrupt or adversely effect the Indian economy which in turn may affect the health of our business.
- Any downgrading of Indian Sovereign rating by international credit rating agencies may negatively impact our business and access to capital.

40. *Changing laws, rules and regulations including adverse application of tax laws and regulations-such as application of goods and service tax could adversely affect our business, results of operations and cash flows.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. Please refer to the section "Key Industry Regulations and Policies" beginning on page 81 for details of the laws currently applicable to us. Any changes to such laws, including the instances briefly mentioned below, may adversely affect our business, financial condition, results of operations and prospects:

- The GoI proposed to revamp the implementation of direct taxes by way of the introduction of the Direct Taxes Code (“DTC”). The DTC proposes to consolidate and amend laws relating to income tax and wealth tax. The Government has indicated in the Union Budget for the financial year from April 1, 2016 to March 31, 2017, that the DTC shall not be pursued further.
- The GoI has proposed a comprehensive national GST regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which has been tabled before the Parliament of India. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.
- Further, the General Anti Avoidance Rules (“GAAR”) are proposed to be effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

41. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Draft Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

42. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus on page 116, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements

that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

43. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the real estate industry contained in the Draft Prospectus.

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the real estate industry has been based on various government publications and reports from government and private agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled 'Our Industry' beginning on page 63 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

44. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the BSE could adversely affect the trading price of the Equity Shares.

45. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

46. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

47. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

48. Financial instability in Indian financial markets could adversely affect Our Company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

49. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

50. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the central or state governments in India that affect our industry including other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time. These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

51. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

52. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 "avian flu" virus, or H1N1, the swine flu virus, cannot currently be predicted,

previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

SECTION III: INTRODUCTION

SUMMARY OF INDUSTRY

This is only the summary and does not contain all information that you shall consider before investing in Equity Shares. You should read this entire Draft Prospectus, including the information on “Risk Factors” and related notes on page 11 of this Draft Prospectus before deciding to invest in Equity Shares.

GLOBAL ECONOMIC OVERVIEW

Output growth in the first quarter of 2016 was somewhat better than expected in emerging market and developing economies and roughly in line with projections for advanced economies, with better-than-expected euro area growth counterbalancing weaker U.S. growth. Productivity growth in most advanced economies remained sluggish, and inflation was below target owing to slack and the effect of past declines in commodity prices. Indicators of real activity were somewhat stronger than expected in China, reflecting policy stimulus, as well as in Brazil and Russia, with some tentative signs of moderation in Brazil’s deep downturn and stabilization in Russia following the rebound in oil prices. While global industrial activity and trade have been lackluster amid China’s rebalancing and generally weak investment in commodity exporters, recent months have seen some pick-up due to stronger infrastructure investment in China and higher oil prices.

The result of the U.K. referendum caught financial markets by surprise. In its immediate aftermath, equity prices declined worldwide. These prices have since rebounded, although as of mid-July bank equity valuations for U.K. and European banks remain substantially lower than before the referendum, and domestically focused U.K. equities are slightly weaker. Yields on safe assets have declined further, reflecting both higher global risk aversion and expectations of easier monetary policy going forward, particularly in the main advanced economies. The pound depreciated sharply—by around 10 percent in nominal effective terms between June 23 and July 15—with more limited changes for other major currencies. The prices of oil and other commodities declined moderately, but have remained well above those underpinning the assumptions for the April 2016 WEO.¹ Post-referendum asset price and exchange rate movements in emerging markets have been generally contained.

Emerging Markets and Developing Economies

Growth in emerging market and developing economies is projected to slow from 4.6 percent in 2014 to 4.2 percent in 2015, broadly as expected. The slowdown reflects the dampening impact of lower commodity prices and tighter external financial conditions—particularly in Latin America and oil exporters, the rebalancing in China, and structural bottlenecks, as well as economic distress related to geopolitical factors—particularly in the Commonwealth of Independent States and some countries in the Middle East and North Africa. In 2016, growth in emerging market and developing economies is expected to pick up to 4.7 percent, largely on account of the projected improvement in economic conditions in a number of distressed economies, including Russia and some economies in the Middle East and North Africa. As noted in earlier WEO reports, in many other emerging market and developing economies, much of the growth slowdown in recent years has amounted to a moderation from above trend growth.

INDIAN ECONOMIC OVERVIEW

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organization (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015¹⁶, the Indian economy will continue to grow more than 7 per cent in 2016¹⁷. The improvement in India’s economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI’s inflation focus supported by benign global commodity prices. India was ranked the highest globally in terms of consumer confidence during October- December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

According to IMF World Economic Outlook Update (January 2016), Indian economy is expected to grow at 7.75 per cent during FY 2016¹⁷, despite the uncertainties in the global market. The Economic Survey 2015-16 had forecasted that the Indian economy will growing by more than seven per cent for the third successive year 2016-17 and can start growing at eight per cent or more in next two years. Foreign direct investment (FDI) in India have increased by 29 per cent during October 2014-December 2015 period post the launch of Make in India campaign, compared to the 15month period before the launch.

Recent Developments

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity. India has emerged as one of the strongest performers with respect to deals across the world in terms of Mergers and Acquisitions (M&A). The total transaction value of M&A involving Indian companies stood at US\$ 26.3 billion with 930 deals in 2015 as against US\$ 29.4 billion involving 870 deals in 2014. In the M&A space, Telecom was the dominant sector, amounting to 40 per cent of the total transaction value. Also, Private equity (PE) investments increased 86 per cent yoy to US\$ 1.43 billion. Total private equity (PE) investments in India for 2015 reached a record high of US\$ 19.5 billion through 159 deals, according to the PwC Money Tree India report.

Government Initiatives

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy. Finance Minister Mr. Arun Jaitley stated that the government is looking at a number of reforms and resolution of pending tax disputes to attract investments. Currently, the manufacturing sector in India contributes over 15 per cent of the GDP. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP.

Road Ahead

The International Monetary Fund (IMF) and the Moody's Investors Service have forecasted that India will witness a GDP growth rate of 7.5 per cent in 2016, due to improved investor confidence, lower food prices and better policy reforms. Besides, according to midyear update of United Nations World Economic Situation and Prospects, India is expected to grow at 7.6 per cent in 2015 and at 7.7 per cent in 2016.

Indian economy would continue to grow at 7 to 9 per cent and would double in size to US\$ 4–5 trillion in a decade, becoming the third largest economy in absolute terms.

Furthermore, initiatives like Make in India and Digital India will play a vital role in the driving the Indian economy.

INDIAN REAL ESTATE SECTOR

The real estate sector in India has come a long way by becoming one of the fastest growing markets in the world. It is not only successfully attracting domestic real estate developers, but foreign investors as well. The growth of the industry is attributed mainly to a large population base, rising income level, and rapid urbanisation. The sector comprises of four sub-sectors- housing, retail, hospitality, and commercial. While housing contributes to five-six percent of the country's gross domestic product (GDP), the remaining three sub-sectors are also growing at a rapid pace, meeting the increasing infrastructural needs.

The real estate sector has transformed from being unorganised to a dynamic and organized sector over the past decade. Government policies have been instrumental in providing support after recognising the need for infrastructure development in order to ensure better standard of living for its citizens. In addition to this, adequate infrastructure forms a prerequisite for sustaining the long-term growth momentum of the economy. The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade.

The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations.

The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

Market Size

The construction development sector in India has received foreign direct investment (FDI) equity inflows to the tune of US\$ 23,874.1 million in the period April 2000-September 2014. The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP). In the period FY08-20, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

Real estate has emerged as the second most active sector, raising US\$ 1.2 billion from private equity (PE) investors in the last 10 months. Foreign investors have bought tenanted office space worth over US\$ 2 billion in India in 2014, a four-fold rise compared to the previous year, in order to increase their rent-yielding commercial assets in Asia's third largest economy.

Major Market Players in India

The Indian real estate sector has traditionally been an unorganised sector but it is slowly evolving into a more organised one. The sector is embracing professional standards and transparency with open arms. The major established domestic players in the sector are DLF, Unitech, Hiranandani Constructions, Tata Housing, Godrej Properties, Omaxe, Parsvanath, Raheja Developers, Ansal Properties and Infrastructure and Mahindra Lifespace Developers Ltd to name a few. International players who have made a name for themselves in India include Hines, Tishman Speyer, Emaar Properties, Ascendas, Capitaland, Portman Holdings and Homex.

Government Initiatives

The Government of India along with the governments of the respective states have taken several initiatives to encourage the development in the sector. The Smart City Project, where there is a plan to build 100 smart cities, is a prime opportunity for the real estate companies. Below are some of the other major Government Initiatives:

Road Ahead

Responding to an increasingly well-informed consumer base and, bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

SECTION IV - ABOUT OUR COMPANY

OUR INDUSTRY

(The information in this chapter has been extracted from publicly available documents prepared by various sources etc. This data has not been prepared or independently verified by us or the Lead Manager or any of their or our respective affiliates or advisors. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors, including those discussed in the section titled “Risk Factors” on page 11 of this Draft Prospectus. Accordingly, investment decisions should not be based on such information)

GLOBAL ECONOMIC OVERVIEW

Output growth in the first quarter of 2016 was somewhat better than expected in emerging market and developing economies and roughly in line with projections for advanced economies, with better-than-expected euro area growth counterbalancing weaker U.S. growth. Productivity growth in most advanced economies remained sluggish, and inflation was below target owing to slack and the effect of past declines in commodity prices. Indicators of real activity were somewhat stronger than expected in China, reflecting policy stimulus, as well as in Brazil and Russia, with some tentative signs of moderation in Brazil’s deep downturn and stabilization in Russia following the rebound in oil prices. While global industrial activity and trade have been lackluster amid China’s rebalancing and generally weak investment in commodity exporters, recent months have seen some pick-up due to stronger infrastructure investment in China and higher oil prices.

The result of the U.K. referendum caught financial markets by surprise. In its immediate aftermath, equity prices declined worldwide. These prices have since rebounded, although as of mid-July bank equity valuations for U.K. and European banks remain substantially lower than before the referendum, and domestically focused U.K. equities are slightly weaker. Yields on safe assets have declined further, reflecting both higher global risk aversion and expectations of easier monetary policy going forward, particularly in the main advanced economies. The pound depreciated sharply—by around 10 percent in nominal effective terms between June 23 and July 15—with more limited changes for other major currencies. The prices of oil and other commodities declined moderately, but have remained well above those underpinning the assumptions for the April 2016 WEO.¹ Post-referendum asset price and exchange rate movements in emerging markets have been generally contained.

From a macroeconomic perspective, the Brexit vote implies a substantial increase in economic, political, and institutional uncertainty, which is projected to have negative macroeconomic consequences, especially in advanced European economies. But with the event still unfolding, it is very difficult to quantify its potential repercussions.

Taking into account the better-than-expected economic activity so far in 2016 and the likely impact of Brexit under the assumptions just described, the global growth forecasts for 2016 and 2017 were both marked down by 0.1 percentage points relative to the April 2016 WEO, to 3.1 percent and 3.4 percent, respectively. The outlook worsens for advanced economies (down by 0.1 percentage points in 2016 and 0.2 percentage points in 2017) while it remains broadly unchanged for emerging market and developing economies.

Emerging Markets and Developing Economies

Growth in emerging market and developing economies is projected to slow from 4.6 percent in 2014 to 4.2 percent in 2015, broadly as expected. The slowdown reflects the dampening impact of lower commodity prices and tighter external financial conditions—particularly in Latin America and oil exporters, the rebalancing in China, and structural bottlenecks, as well as economic distress related to geopolitical factors—particularly in the

Commonwealth of Independent States and some countries in the Middle East and North Africa. In 2016, growth in emerging market and developing economies is expected to pick up to 4.7 percent, largely on account of the projected improvement in economic conditions in a number of distressed economies, including Russia and some economies in the Middle East and North Africa. As noted in earlier WEO reports, in many other emerging market and developing economies, much of the growth slowdown in recent years has amounted to a moderation from above trend growth.

Risks to the Outlook

As noted earlier, with Brexit still very much unfolding, the extent of economic and political uncertainty has risen, and the likelihood of outcomes more negative than the one in the baseline has increased. Box 1 sketches the potential ramifications on the global outlook of two alternative scenarios, which envisage a more acute tightening of global financial conditions and larger confidence effects as a result of Brexit than those assumed in the WEO baseline.

INDIAN ECONOMIC OVERVIEW

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015-16, the Indian economy will continue to grow more than 7 per cent in 2016-17. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices. India was ranked the highest globally in terms of consumer confidence during October- December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

According to IMF World Economic Outlook Update (January 2016), Indian economy is expected to grow at 7.75 per cent during FY 2016-17, despite the uncertainties in the global market. The Economic Survey 2015-16 had forecasted that the Indian economy will growing by more than seven per cent for the third successive year 2016-17 and can start growing at eight per cent or more in next two years. Foreign direct investment (FDI) in India have increased by 29 per cent during October 2014-December 2015 period post the launch of Make in India campaign, compared to the 15month period before the launch.

Recent Developments

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity. Some of them are as follows:

India has emerged as one of the strongest performers with respect to deals across the world in terms of Mergers and Acquisitions (M&A). The total transaction value of M&A involving Indian companies stood at US\$ 26.3 billion with 930 deals in 2015 as against US\$ 29.4 billion involving 870 deals in 2014. In the M&A space, Telecom was the dominant sector, amounting to 40 per cent of the total transaction value. Also, Private equity (PE) investments increased 86 per cent yoy to US\$ 1.43 billion. Total private equity (PE) investments in India for 2015 reached a record high of US\$ 19.5 billion through 159 deals, according to the PwC Money Tree India report.

Government Initiatives

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy. Currently, the manufacturing sector in India contributes over 15 per cent of the GDP. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP.

Following the government's initiatives several plans for investment have been undertaken which are as follows:

- The Union Cabinet has approved the introduction of several short term (within one year) and medium term measures (within two years) to be implemented by government ministries, departments and organisations for promotion of payments through cards and digital means, and to reduce cash transactions.
- Prime Minister Mr Narendra Modi announced at the International Monetary Fund (IMF) conference on 'Advancing Asia: Investing for the Future' in New Delhi that the government will continue to bring in new reforms for transforming economy without resorting to undervaluing its exchange rate to boost trade.
- Government of India plans to create a National Investment Grid to map business opportunities across the country which will make it easier for investors, especially domestic investors, to access and explore investment opportunities.
- Prime Minister, Mr. Narendra Modi, launched the Startup India initiative and unveiled the Startup Action Plan which includes creation of a dedicated Startup fund worth Rs 10,000 crore (US\$ 1.47 billion) apart from other incentives like no tax on profits for first three years and relaxed labour laws.
- British telecom giant Vodafone, India's second largest telecom operator, plans to invest over Rs 13,000 crore (US\$ 1.91 billion) in India, to upgrade and expand its network and also for its payments bank operations.
- Foxconn Technology group, Taiwan's electronics manufacturer, is planning to manufacture Apple iPhones in India. Besides, Foxconn aims to establish 1012 facilities in India including data centers and factories by 2020.
- US based First Solar Inc and China's Trina Solar have plans to set up manufacturing facilities in India. Clean energy investments in India increased to US\$ 7.9 billion in 2014, helping the country maintain its position as the seventh largest clean energy investor in the world.
- Hyderabad is set to become the mobile phone manufacturing hub in India and is expected to create 150,000 – 200,000 jobs. Besides, the Telangana Government aims to double IT exports to Rs 1.2 trillion (US\$ 17.61 billion) by 2019.
- General Motors plans to invest US\$1 billion in India by 2020, mainly to increase the capacity at the Talegaon plant in Maharashtra from 130,000 units a year to 220,000 by 2025.
- Hyundai Heavy Industries (HHI) and Hindustan Shipyard Ltd have joined hands to build warships in India. Besides, Samsung Heavy Industries and Kochi Shipyard will be making Liquefied Natural Gas (LNG) tankers.

Road Ahead

The International Monetary Fund (IMF) and the Moody's Investors Service have forecasted that India will witness a GDP growth rate of 7.5 per cent in 2016, due to improved investor confidence, lower food prices and better policy reforms. Besides, according to midyear update of United Nations World Economic Situation and Prospects, India is expected to grow at 7.6 per cent in 2015 and at 7.7 per cent in 2016.

Furthermore, initiatives like Make in India and Digital India will play a vital role in the driving the Indian economy.

INDIAN REAL ESTATE SECTOR

The real estate sector in India has come a long way by becoming one of the fastest growing markets in the world. It is not only successfully attracting domestic real estate developers, but foreign investors as well. The growth of the industry is attributed mainly to a large population base, rising income level, and rapid urbanisation. The sector comprises of four sub-sectors- housing, retail, hospitality, and commercial. While housing contributes to five-six percent of the country's gross domestic product (GDP), the remaining three sub-sectors are also growing at a rapid pace, meeting the increasing infrastructural needs.

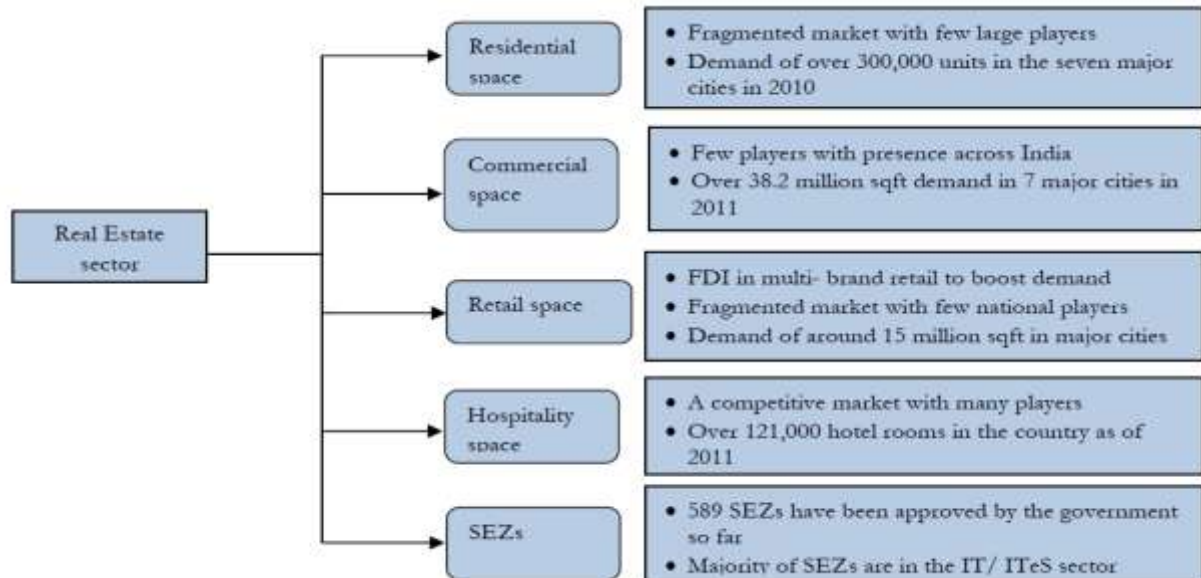

The real estate sector has transformed from being unorganised to a dynamic and organized sector over the past decade. Government policies have been instrumental in providing support after recognising the need for infrastructure development in order to ensure better standard of living for its citizens. In addition to this, adequate infrastructure forms a prerequisite for sustaining the long-term growth momentum of the economy. The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade.

The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations.

The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

SEGMENTS IN THE INDIAN REAL ESTATE SECTOR

Market Size

The construction development sector in India has received foreign direct investment (FDI) equity inflows to the tune of US\$ 23,874.1 million in the period April 2000-September 2014. The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP). In the period FY08-20, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

Real estate has emerged as the second most active sector, raising US\$ 1.2 billion from private equity (PE) investors in the last 10 months. Foreign investors have bought tenanted office space worth over US\$ 2 billion in India in 2014, a four-fold rise compared to the previous year, in order to increase their rent-yielding commercial assets in Asia's third largest economy.

Mumbai is the best city in India for commercial real estate investment, with returns of 12-19 per cent likely in the next five years, followed by Bengaluru and Delhi-National Capital Region (NCR). Also, Delhi-NCR was the biggest office market in India with 110 million sq ft, out of which 88 million sq ft were occupied. Sectors such as IT and ITeS, retail, consulting and e-commerce have registered high demand for office space in recent times

Delhi's Central Business District (CBD) of Connaught Place has been ranked as the sixth most expensive prime office market in the world with occupancy costs at US\$ 160 per sq ft per annum.

Major Market Players in India

The Indian real estate sector has traditionally been an unorganised sector but it is slowly evolving into a more organised one. The sector is embracing professional standards and transparency with open arms. The major established domestic players in the sector are DLF, Unitech, Hiranandani Constructions, Tata Housing, Godrej Properties, Omaxe, Parsvanath, Raheja Developers, Ansal Properties and Infrastructure and Mahindra Lifespace Developers Ltd to name a few. International players who have made a name for themselves in India include Hines, Tishman Speyer, Emaar Properties, Ascendas, Capitaland, Portman Holdings and Homex.

Government Initiatives

The Government of India along with the governments of the respective states have taken several initiatives to encourage the development in the sector. The Smart City Project, where there is a plan to build 100 smart cities, is a prime opportunity for the real estate companies. Below are some of the other major Government Initiatives:

- India's Prime Minister Mr. Narendra Modi approved the launch of Housing for All by 2022. Under the Sardar Patel Urban Housing Mission, 30 million houses will be built in India by 2022, mostly for the economically weaker sections and low-income groups, through public-private-partnership (PPP) and interest subsidy.
- The Government of India has relaxed the norms to allow Foreign Direct Investment (FDI) in the construction development sector. This move should boost affordable housing projects and smart cities across the country.
- The Securities and Exchange Board of India (SEBI) has notified final regulations that will govern real estate investment trusts (REITs) and infrastructure investment trusts (InvITs). This move will enable easier access to funds for cash-strapped developers and create a new investment avenue for institutions and high net worth individuals, and eventually ordinary investors.
- The Government of Maharashtra announced a series of measures to bring transparency and increase the ease of doing business in the real estate sector.
- The State Government of Kerala has decided to make the process of securing permits from local bodies for construction of houses smoother, as it plans to make the process online with the launch of a software called 'Sanketham'. This will ensure a more standardised procedure, more transparency, and less corruption and bribery.

Challenges & Investment Opportunities

Challenges

The key challenges that the Indian real estate industry is facing today are:

- lack of clear land titles,
- absence of title insurance,
- absence of industry status,
- lack of adequate sources of finance,
- shortage of labour,
- rising manpower and material costs,
- approvals and procedural difficulties.

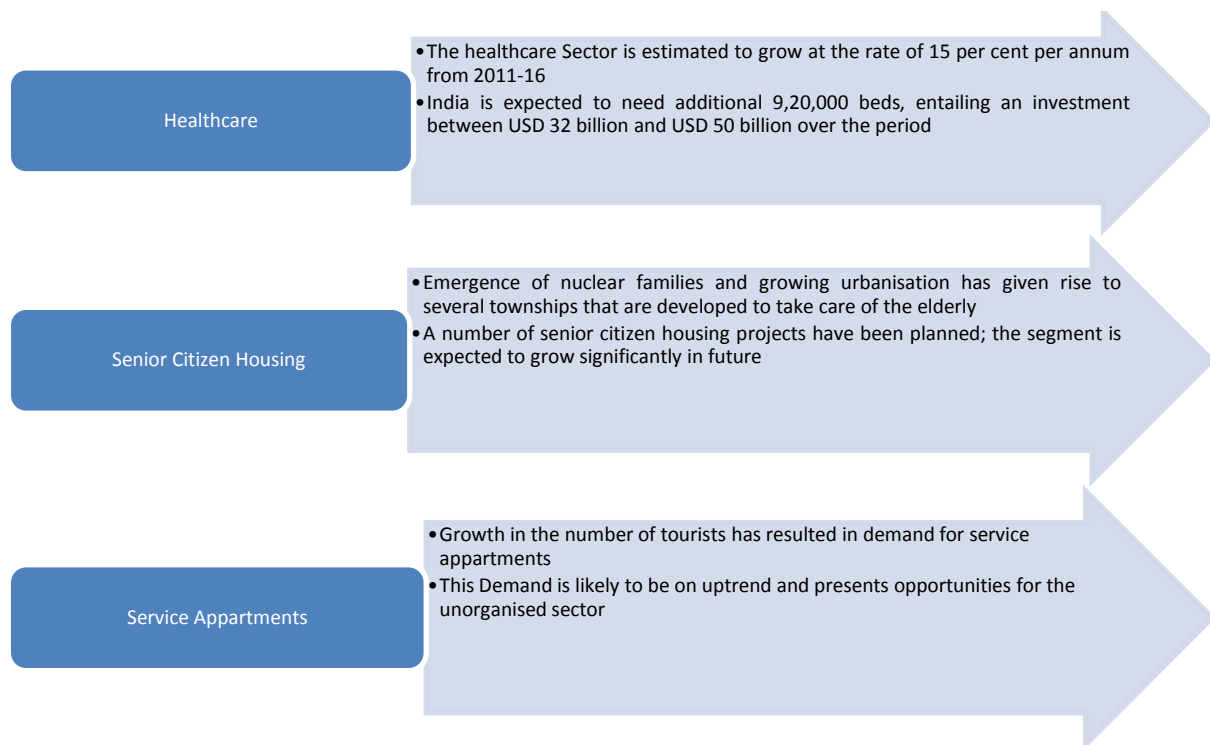

Investments

The real estate industry in India is yet in a promising stage. The sector happens to be the second largest employer after agriculture and is expected to grow at the rate of 30 per cent over the next decade. A growing migrant population due to increasing job opportunities, together with healthy infrastructure development, is underpinning demand in the region's residential real estate market. It is believed that the Finance Ministry's motivation through softening of interest rates and lending more to the real estate sector will have a positive impact on both developers and consumers. The real estate market could start to perform better as the easing of FDI norms will begin to show results during the second half of the year.

Real estate contributed about 6.3 per cent to India's gross domestic product (GDP) in 2013. The market size of the sector is expected to increase at a compound annual growth rate (CAGR) of 11.2 per cent during FY 2008-2020 to touch US\$ 180 billion by 2020. The Government of India has allocated US\$ 1.3 billion for Rural Housing Fund in the Union Budget 2014-15. It also allocated US\$ 0.7 billion for National Housing Bank (NHB) to increase the flow of cheaper credit for affordable housing for urban poor. The government has allowed FDI of up to 100 per cent in development projects for townships and settlements.

The entry of major private players in the education sector has created vast opportunities for the real estate sector. Emergence of nuclear families and growing urbanisation has given rise to several townships that are developed to take care of the elderly. A number of senior citizen housing projects have been planned, and the segment is expected to grow significantly in future. Growth in the number of tourists has resulted in demand for service apartments. This demand is likely to be on the uptrend and presents opportunities for the unorganised sector.

Niche sectors expected to provide growth opportunities

The Indian real estate sector has witnessed high growth in recent times with the rise in demand for office as well as residential spaces. According to data released by Department of Industrial Policy and Promotion (DIPP), the construction development sector in India has received Foreign Direct Investment (FDI) equity inflows to the tune of US\$ 24.1 billion in the period April 2000-June 2015.

- Assotech Realty has tied up with Lemon Tree Hotels to manage and operate its serviced residences. The first project, 210 apartments under the branding of Sandal Suites, will be launched in Noida in 2015. The companies will launch 8-10 similar projects in a phased manner over the next seven years with an investment of Rs 8000-9000 million (US\$ 129- 145 million) approximately.
- Blackstone Group LP is all set to become the largest owner of commercial office real estate in India after a three-year acquisition drive in which it spent US\$ 900 million to buy prime assets. Blackstone has acquired 29 million sq ft of office space in cities such as Bengaluru, Pune, Mumbai, and Noida on the outskirts of New Delhi.
- L&T Infra Finance Private Equity (PE) plans to raise Rs 37,500 million (US\$ 607 million) in an overseas and a domestic fund, and launch a real estate fund.
- IDFC Alternatives Ltd has sold two of its real estate investments to PE firm Blackstone Group LP. The assets - a special economic zone (SEZ) in Pune and an information technology (IT) park in Noida - were sold for a combined enterprise value of Rs 11,000 million (US\$ 178 million).

- Goldman Sachs plans to invest Rs 12,000 million (US\$ 194 million) to build a new campus in Bengaluru that can accommodate 9,000 people. The new campus is being developed in collaboration with Kalyani Developers on the Sarjapur Outer Ring Road, Bengaluru.
- Snapdeal has entered into a strategic partnership with Tata Value Homes to sell the latter's apartments on its e-commerce platform, which marks the first time that an ecommerce company has tied up with a real estate venture.
- Google Capital has invested in Bengaluru-based online property search platform, CommonFloor.com.
- Omkar Realtors and Developers Private Limited is in discussions to raise Rs 400 crore (US\$ 60.25 million) from KKR India, the local arm of PE firm Kohlberg Kravis Roberts and Co.
- Goldman Sachs bought shares worth Rs 255 crore (US\$ 38.41 million) in Vatika Hotels Private Limited, a company owned by real estate and hospitality firm Vatika Group.
- SoftBank, Falcon Edge Capital and a few others invested US\$ 90 million in Locon Solutions Private Limited, which runs Housing.com - a realty website.
- The Qatar Prince, Hamad bin Khalifa Al Thani, plans to invest Rs 1,000 billion (US\$ 15.06 billion) over the next five years in at least 10 smart cities of India.
- Real estate firm Supertech has planned to invest about Rs 2,000 crore (US\$ 301.27 million) in Gurgaon over the next few years by launching several luxury and affordable projects.
- PE firm Warburg Pincus invested Rs 1,800 crore (US\$ 271.14 million) in Piramal Realty for a minority stake in the company.
- China's Fosun International Limited is seeking to invest US\$ 100 million in Locon Solutions, the owner of Housing.com.

Road Ahead

Responding to an increasingly well-informed consumer base and, bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

PHASES OF PROPERTY DEVELOPMENT

A. Land Identification and areas for potential development

A key factor for success of our business is land identification at strategic locations at reasonable pricing or ratio. Our in-house market research helps us to evaluate any decision pertaining to acquisition or developing any of the identified properties. The process of land identification starts with selecting an appropriate area in a particular city or town, which we believe has growth potential. Our internal land development team gathers market data on possible sites while selecting a particular location for development within that area. Thereafter, we conduct market research with reference to the proposed location and identify the land within that location, after an internal feasibility assessment involving assessment of title of the land as well as the potential of development. The next step, after land identification, involves conceptualizing the type and scale of property development to be undertaken on that particular land. Substantial value addition can be done by purchasing inexpensive land and by converting the land from raw land to developable land. The conversion can be by way of changing the zone or development status of the land or by way of bringing in infrastructure or access to the land parcel.

B. Land Acquisition or Joint Development Arrangements

Based on our feasibility study of identified land, either we acquire the land on an outright purchase or enter into a joint development agreement with the owners. The sustainability of our business is dependent on our land acquisition costs and on the availability of land for our business growth. Land costs have generally increased in the past years and we believe that this trend will continue in the future as well subject to general economic conditions and other factors. We acquire land from private parties after conducting due diligence & obtaining Title Clearance from renowned advocates. The cost of acquisition of land which includes the amounts paid for freehold rights, leasehold rights, registration, stamp duty etc. constitutes substantial part of our project cost. We are generally required to pay an advance at the time of executing transaction agreements with the remaining purchase price payable on completion of acquisition.

We also acquire the rights to develop plots/land through arrangement with other entities that owns the land or is in possession of land development rights. The entity is given the option, as consideration, to either share the sale proceeds or receive a portion of the developed/ built up area as may be mutually decided and agreed upon.

C. Project Planning, Designing and Regulatory Approvals

Our in-house project planning, design and execution team initiates the process to obtain the applicable regulatory approvals and clearances which may be general or specific to location. In this phase, we make detailed specifications and drawings of the proposed project with the help of government approved surveyors, undertake necessary approvals and assess the resources required to complete the project. We retain responsibility for obtaining all necessary approvals and permits for each of our projects and have a team, whose function is to obtain approvals from government authorities. We work in close coordination with the government authorities and we believe that we have the requisite knowledge of the process and requirements for obtaining all necessary approvals.

D. Construction

We follow a model of outsourcing the project execution activity by way of sub-contracting the different tasks. But to ensure quality standards, all the purchases pertaining to a project are controlled by us. Our management conducts regular site visits. We have developed a monthly internal reporting system to help ensure effective monitoring of the status of all of our projects at any given time. This has helped us to improve efficiency and reduce time and cost overruns.

E. Sales and Marketing

We convey the title of the properties to the customers upon the completion of the project, and closure of the sales process as per applicable laws. Certification trademarks and collective marks are also registrable under the Trade Marks Act. An application for trademark registration may be made by any person claiming to be the proprietor of a trademark and can be made on the basis of either current use or intention to use a trademark in the future. The registrations of certain types of trademarks are absolutely prohibited, including trademarks that are not distinctive and which indicate the kind or quality of the goods. Applications for a trademark registration may be made for in one or more classes. Once granted, trademark registration is valid for ten years, unless cancelled. The registration can be renewed for further period of ten years. If not renewed after ten years, the mark lapses and the registration for such mark have to be obtained afresh. While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. Registered trademarks may be protected by means of an action for infringement, whereas unregistered trademarks may only be protected by means of the common law remedy of passing off. In case of the latter, the plaintiff must, prior to proving passing off, first prove that he is the owner of the trademark concerned. In contrast, the owner of a registered trademark is prima facie regarded as the owner of the mark by virtue of the registration obtained.

The Companies Act, 1956

The Companies Act, 1956 deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Act primarily regulates the formation, financing, functioning and winding up of companies. The Companies Act, 1956 prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. It deals with issue, allotment and transfer of securities and various aspects relating to company management. It provides for standard of disclosure in public issues of capital, particularly in the fields of company management and projects, information about other listed companies under the same management, and management perception of risk factors. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act, 1956 plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

The Companies Act, 2013

The Companies Act, 2013, has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Electricity Act, 2003

The Electricity Act, 2003 (the “EA 2003”) is a central unified legislation relating to generation, transmission, distribution, trading and use of electricity, that seeks to replace the multiple legislations that governed the Indian power sector. The most significant reform initiative under the EA 2003 was the move towards a multi buyer, multi seller system as opposed to the existing structure which permitted only a single buyer to purchase power from power generators. In addition, EA 2003 provides for a greater flexibility and grants the respective electricity regulatory commissions “greater freedom in determining tariffs, without being constrained by rate-of-return regulations. The Act seeks to encourage competition with appropriate regulatory intervention. An Appellate Tribunal to hear appeals against the decision of the Central Electricity Regulatory Commission and State Electricity Regulatory Commissions has been established. However, EA 2003 provided that transmission, distribution and trade of electricity are regulated activities which require licenses from the appropriate electricity regulatory commission, unless exempted by the appropriate government in accordance with the provisions of EA 2003. It was amended in 2007 to exempt captive power generation plants from licensing requirements for supply to any licensee or consumer. Government has also announced National Electricity Policy in 2005 to guide the development of the electricity sector in India.

Pursuant to a notification dated October 14, 2009, the Central Electricity Regulatory Commission has notified the Central Electricity Regulatory Commission (Furnishing of Technical Details by the Generating Companies) Regulations, 2009, which requires that electricity generating companies furnish technical details to the Central

Electricity Regulatory Commission regarding the generating stations operated by them. Furthermore, these regulations stipulate that any power generating company that proposes to set up a 85 generating station must provide the Central Electricity Regulatory Commission with the required technical details three years prior to the commercial operation of the stations proposed to be set up.

INDUSTRY OVERVIEW

Global Economic Overview

Output growth in the first quarter of 2016 was somewhat better than expected in emerging market and developing economies and roughly in line with projections for advanced economies, with better-than-expected euro area growth counterbalancing weaker U.S. growth. Productivity growth in most advanced economies remained sluggish, and inflation was below target owing to slack and the effect of past declines in commodity prices. Indicators of real activity were somewhat stronger than expected in China, reflecting policy stimulus, as well as in Brazil and Russia, with some tentative signs of moderation in Brazil's deep downturn and stabilization in Russia following the rebound in oil prices. While global industrial activity and trade have been lackluster amid China's rebalancing and generally weak investment in commodity exporters, recent months have seen some pick-up due to stronger infrastructure investment in China and higher oil prices.

These data, together with financial market developments in the months before the referendum, indicated a global economic outlook broadly in line with the April 2016 WEO forecast, with some improvement of the outlook for a few large emerging markets even pointing to a modest upward revision to global growth for 2017 (0.1 percentage point).

Emerging Markets and Developing Economies

Growth in emerging market and developing economies is projected to slow from 4.6 percent in 2014 to 4.2 percent in 2015, broadly as expected. The slowdown reflects the dampening impact of lower commodity prices and tighter external financial conditions—particularly in Latin America and oil exporters, the rebalancing in China, and structural bottlenecks, as well as economic distress related to geopolitical factors—particularly in the Commonwealth of Independent States and some countries in the Middle East and North Africa. In 2016, growth in emerging market and developing economies is expected to pick up to 4.7 percent, largely on account of the projected improvement in economic conditions in a number of distressed economies, including Russia and some economies in the Middle East and North Africa. As noted in earlier WEO reports, in many other emerging market and developing economies, much of the growth slowdown in recent years has amounted to a moderation from above trend growth.

INDIAN ECONOMIC OVERVIEW

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015-16, the Indian economy will continue to grow more than 7 per cent in 2016-17. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices. India was ranked the highest globally in terms of consumer confidence during October- December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

INDIAN REAL ESTATE SECTOR

The real estate sector in India has come a long way by becoming one of the fastest growing markets in the world. It is not only successfully attracting domestic real estate developers, but foreign investors as well. The growth of the industry is attributed mainly to a large population base, rising income level, and rapid urbanisation. The sector comprises of four sub-sectors- housing, retail, hospitality, and commercial. While housing contributes to five-six percent of the country's gross domestic product (GDP), the remaining three sub-sectors are also growing at a rapid pace, meeting the increasing infrastructural needs.

The real estate sector has transformed from being unorganised to a dynamic and organized sector over the past decade. Government policies have been instrumental in providing support after recognising the need for infrastructure development in order to ensure better standard of living for its citizens. In addition to this, adequate infrastructure forms a prerequisite for sustaining the long-term growth momentum of the economy. The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade.

The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations.

The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the FIPB and the RBI.

The Government has from time to time made policy pronouncements on foreign direct investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), issued the Consolidated FDI Policy Circular of 2016 (“**FDI Circular 2016**”), which, with effect from June 7, 2016, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2016 will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.

The Equity Shares have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be qualified institutional buyers (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A of the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
