Any reliance by persons not familiar with Indian accounting practices, the Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations on the financial disclosures presented in this Draft Prospectus should accordingly be limited. We have not attempted to quantify the impact of the IFRS or the U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those under the U.S. GAAP or the IFRS and we urge you to consult your own advisors regarding such differences and their impact on our financial data.

Internal Risk Factors

1. ***Our Registered Office and Manufacturing unit are not owned by us. If we are required to vacate the same, due to any reason whatsoever, it may adversely affect our business operations.***

Our Company has its registered office and Manufacturing unit at the premises that are not owned by our Company. Our Company has been occupying such premises under Lease /Rent Agreements from several third parties at a payment of rent. Although, we believe that we have complied with all the terms of such agreements, in the event there is any breach or violation of the same, we may be required to vacate the same. Further, in any event, on expiry of such agreements, if the respective owners are not willing to renew the same, the aforesaid properties may have to be vacated and we may be required to look for alternate premises, which we may not be able to find at terms favourable to our Company. In such an event, it will adversely affect our business operations and our financial condition.

For further details please see the heading 'Property' in the section titled 'Our Business' on page no. 70 of this Draft Prospectus.

2. ***We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.***

Our performance depends largely on the efforts and abilities of our senior management and other key personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director's and officer's insurance policy or any key man insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

3. ***Our Company is involved in certain legal proceedings. Any adverse decision in such proceedings may render us liable to liabilities / penalties which may adversely affect our business, financial condition and reputation.***

Our Company is involved in certain legal proceedings. A classification of these legal and other proceedings are given in the following table:

| Particulars | Civil cases | Criminal cases | Tax cases | Financial implications to the extent quantifiable (Rs. in Lakhs) |
|---|-------------|----------------|-----------|--|
| Litigations against our Company | - | - | 4 | 2.83 |
| Litigations by our Company | - | - | - | - |
| Litigations against our Promoters and Directors | 1 | - | 7 | 15.15 |
| Litigation against our Promoter Group Entities | 1 | - | 20 | 104.94 |

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. We can give no assurance that these legal proceedings will be decided in our favour. We may incur significant expenses and management time in such legal proceedings. If any adverse developments arise, for example, a change in Indian law or rulings against us by the appellate courts or tribunals, we may face losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities. Any adverse decision may render us / them liable to liabilities / penalties and may have a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

For further details regarding these legal proceedings, please refer 'Outstanding Litigations and Material Developments' on page 162 of this Draft Prospectus.

4. ***Our business is dependent on our manufacturing unit which is located in Jamshedpur, Jharkhand. Any loss or shutdown of operations at our manufacturing unit may have an adverse effect on our business and results of operations.***

Our manufacturing unit is located in Jamshedpur, Jharkhand. In the event that there are any disruptions at our manufacturing unit due to natural calamities, civil disturbances or any adverse political, social or economic conditions, our ability to manufacture certain products may be adversely affected. Disruptions in our manufacturing activities could delay production or require us to shut down our manufacturing unit.

We have not experienced any of these operating risks in the past. Although, we have contingency plans to meet most of our operating risks we cannot assure you about the adequacy of such plans will be adequate to meet all of our operating risks.

5. ***Any shortfall in the supply of our raw materials or an increase in our raw material costs, or other input costs, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.***

The primary raw materials used by our Company i.e. Cold Roll Coil, Hot Roll Coil, Billets, Steel pipes & tubes, are subject to supply disruptions and price volatility caused by various factors such as commodity market fluctuations, the quality and availability of raw materials, currency fluctuations, consumer demand, changes in government policies and regulatory sanctions. We purchase our raw materials from third party suppliers. For Fiscal 2016, we sourced 54.16% of our raw materials from our top five suppliers. For further detail, please refer "Management's Discussion & Analysis of Financial Condition and Results of Operations" on page 153 of this draft prospectus.

Typically, we do not enter into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Fluctuations in the price, availability and quality of raw materials used in our products, could have a material adverse effect on cost of sales or our ability to meet customer demands. There can be no assurance that we will always be successful in our efforts to protect our business from the volatility of the market price of raw materials, and our business can be affected by dramatic

movements in prices of raw materials. Discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us.

Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since these suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside, or even instead of us. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected. Further, should there be any significant increases in prices of the raw materials used, and we are unable to pass on such increases in prices to our customers or find alternative suppliers/sources of direct materials who are able to supply us the raw materials at competitive prices, our business and financial performance will be adversely affected.

6. *Our Company, Promoters and Promoter Group were subjected to search operations conducted by the Indian income tax authorities which could result in additional tax liability and other consequences and have a material adverse effect on our financial condition and results of operations.*

The Director of Income Tax (Investigation), conducted search operations at the residences and bank lockers of our Promoters, our Registered Office at 7B, Punwani Chambers, Kiran Shankar Roy Road, Kolkata- 700001, our Corporate Office at C-54, 55 & 56, Phase IV, NS 7 & 8, Phase IV, B-13, B-14P, B-27P & B- 8, Adityapur Industrial Area, Gamharia, Jamshedpur-832 108 and the offices of our promoter group companies. During the course of the search and seizure operations, certain documents and articles were seized from abovesaid locations. In addition, panchnamas were issued to our promoters, Company and promoter group who were further ordered not to part with certain records and articles which were present during the search operations. Additionally, summon was issued to our Promoter, Dilip Kumar Goyal to appear before the Deputy Director of Income Tax (Inv.), Jamshedpur and was attended by him. For further information see the sub-sections titled, “*Outstanding Litigation and Material Developments*” on Page 162 of this Draft Prospectus.

Whilst our Company or Promoters or Promoter group have not received any demand notice from the Income Tax Department or any other regulatory authority in connection with this matter, there can be no assurance that we will not be subject to further investigation, re-assessment or re-computation of income tax for the past assessment years and/or other action by the Director of Income Tax or any other regulatory authority in this matter.

In addition, we cannot assure you of the quantum of any tax liability that may ultimately be assessed or that the provision we intend to make will be sufficient to cover any such tax liability that is finally assessed. Further, we cannot assure you that the Income Tax Department will not make any further enquiries, extend or expand the scope of its investigation or take regulatory action against our Company, promoters and promoter group. Moreover, the Income Tax Department could take action against our Company or Promoters, or Promoter group, which could result in personal liability on their behalf.

Any further proceedings initiated relating to these matters may take up time and attention of our management, and any adverse ruling may have a material adverse effect on our reputation, business, financial condition and results of operations. Furthermore, if the final outcome of the search and seizure operations is adverse, we will be liable to pay the demand raised and any additional amounts as may be imposed by the income tax authorities or other penalties, which could have a material adverse effect on our financial condition and results of operations.

7. *Our efforts at integrating acquired businesses may not yield timely or effective results, which may affect our financial condition and results of operations.*

In addition to growth through our internal efforts, we intend to rely upon strategic acquisitions to provide us with access to new formulation businesses, products and markets. Our Company has entered into a slump sale agreement dated March 09, 2015 with ASL Enterprises Limited whereby ASL Enterprises Limited has agreed to irrevocably assign, transfer its Forging Division together with all the assets and liabilities as per the Audited Balance sheet of its Forging Division including its business premises located at B-13,B-14(P), B- 27(P) & B-28, Phase VI, Adityapur Industrial Area, Gamharia, Dist-Saraikella, Kharsawan-832108, Jharkhand as a going concern.

These strategic acquisitions may require significant attention from our management, and the diversion of our management's attention and resources could have an adverse effect on our ability to manage our business. We may also experience difficulties in integrating acquisitions into our existing business and operations. Our failure to derive anticipated synergies could affect our business, financial condition and results of operations.

8. *We have entered into certain related party transactions and may continue to do so.*

We have entered into related party transactions with our Promoters, Promoter Group, Group Entities and Directors. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the future. For details of these transactions, please refer to section titled "Related Party Transactions" at page 118 of this Draft Prospectus.

9. *Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

| Net Cash from Financing Activities | (361.13) | 584.19 | 2354.28 | (610.19) |

10. *Some of our corporate records/documents including transfer deeds and forms filed with the Registrar of Companies are not traceable.*

Certain of our Company's corporate records and prescribed regulatory filings with the RoC, including those in relation to: (a) allotment of our Equity Shares in the past; (b) appointment of Mr. Dilip Kumar Goyal as director of our company; (c) changes in the name of our company from "Ajanta Composite Pvt. Ltd." to "ASL Industries Pvt. Ltd."; (d) conversion of Ajanta Industries, a partnership firm into Ajanta Composite Pvt. Ltd.

Despite having conducted an extensive search of our records and a search in the records of the RoC for some of the untraceable documents, which was conducted by a practicing company secretary engaged by us, we have not been able to retrieve the aforementioned documents. Accordingly, we have relied on other documents, including corresponding board and/or shareholder resolutions, where available, statutory registers of members, allotment and share transfer, annual reports and audited financial statements for such matters, some of which record varying dates of such events. We cannot assure you that the above mentioned form filings and resolutions will be available in the future or that we will not be subject to penalties imposed by regulatory authorities in this respect.

Furthermore, the transfer deeds for the period February 20, 1992 to September 30, 2011 in relation to the transfer of shares of our Company are currently not traceable. Further, the details of such transfers have been included in the register of transfer and transmission and register of members maintained by the Company in accordance with the Companies Act, 1956 and historical and present details of members of the Company have been filed by the Company with the Registrar of Companies annually in Form 20B as required under the Companies Act, 1956, we cannot assure you that these deeds will be available in the future or that we will not be subject to any penalty imposed by the competent regulatory authority in this respect.

The disclosures pertaining to the aforementioned matters currently made in this Draft Prospectus are on basis of information readily available from public domains and with our Company. For further information, please refer "History and Certain other Corporate Matters" on page 88 of this Draft Prospectus.

11. *Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on various assumptions and estimates and future production and capacity utilization may vary.*

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on various assumptions and estimates of our management,

including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to potential utilization levels and operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Prospectus.

12. *We are subject to various laws and regulations, including environmental and occupational health and safety laws and regulations. Failure to obtain, renew or comply with necessary regulatory approvals and licenses may result in an adverse effect on our financial condition and results of operations.*

We may require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business, including in relation to the protection of the environment and occupational health and safety, and those governing the generation, transportation and disposal of, environmental pollutants or hazardous materials resulting from our manufacturing processes. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, delay in issuance or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For more information, please refer “Key Industry Regulations and Policies” and “Government and Other Approvals” on pages 80 and 167 respectively of this Draft Prospectus.

13. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed objects, as detailed in the section titled “Objects of the Issue” are to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

14. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution and actual cost may vary compared with the estimated amount.*

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our board. In addition, schedule of implementation as described herein are based on management’s current expectations and are subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

Further, we currently do not have any long term contractual arrangements with our significant customers and conduct business with them on the basis of purchase orders that are placed from time to time. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business from our significant customers.

17. *Our insurance cover may be inadequate to fully protect us from all losses and may in turn adversely affect our financial condition.*

Our Company believes that its insurance coverage is adequate and consistent with industry standards. Our Company maintains a number of insurance policies to cover our assets, liabilities and risks that we face inherent to our business activities and operations.

Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot assure you that the terms of our insurance policies will be adequate to cover all damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our results of operations or cash flow may be affected.

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. . 21. *The Promoters and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.*

Upon completion of this Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

22. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.*

In order to retain flexibility and control costs, we appoint independent contractors who in turn engage on-site contract labour for performance of certain of our operations. As on February 28, 2017, more than 250 contract labourers were engaged at our manufacturing unit. Although we do not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractor. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, under the Contract Labour Act, we may be required to absorb a number of such contract labourers as permanent employees. Accordingly, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

23. *We do not have certain documents evidencing certain information evidencing the biographies of the Directors and the Key Managerial Personnel under the section "Our Management" of this Draft Prospectus.*

We do not have certain documents evidencing the biographies of our Directors and Key Managerial Personnel referred under the section "Our Management" on page 92 of this Draft Prospectus. Furthermore relevant copies of the educational qualification of our Directors namely, Mr. Dilip Kumar Goyal (Promoter and Non-Executive Director), Ms. Jayshree Goyal (Promoter and Non-Executive Director), and Mr. Bishwanath Sharma (Independent Director) are not traceable. The information included in the section are based on the details provided by the respective Directors and Key Managerial Personnel, and are supported by a certificate and an affidavit executed by them certifying the authenticity of the information provided. We cannot assure you that all information relating to such Directors and Key Managerial Personnel included in the section "Our Management" are true and accurate.

24. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. There is no guarantee that we will successfully execute our business strategies on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

25. *Inability to meet our obligations, including financial and other covenants under our financing arrangements could adversely affect our business and results of operations.*

As of December 31, 2016, the total outstanding secured borrowing of our Company was Rs.2276.65 lakhs. We have entered into agreements for fund based and non-fund based credit facilities including term loans, vehicle loans. Some of these agreements contain restrictive covenants relating to issuance of new shares, changes in capital structure, making material changes to constitutional documents, implementing any expansion scheme, incurring further indebtedness etc. Further, as on the date of this draft prospectus we are yet to receive the consent/NOC from our banker and lenders for this proposed IPO. Our Company proposes to obtain such consents prior to filing the Prospectus with the RoC.

For further information on the indebtedness of our Company, please refer the Section "**Financial Indebtedness**" on page 151 of this Draft Prospectus.

- 26. *Our Promoters have provided personal guarantees for our borrowings to secure our loans. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.***

Our Promoters have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

- 27. *We have high working capital requirements. If we experience insufficient cash flows to enable us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.***

Our business requires a substantial amount of working capital for our business operations. We would require additional working capital facilities in the future to satisfy our working capital need which is proposed to be met through the IPO proceeds. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/cash flows would be adversely affected to that extent, and consequently affect our operations, revenue and profitability.

- 28. *Certain qualifications have been noted by Peer Review Auditors in their report on the Restated Consolidated Financial Statements.***

Our Peer Review Auditors have provided certain qualifications in their report on the Restated Financial Statements in relation to the period ended September 30, 2016 and fiscal years ended 2016, 2015, 2014, 2013 and 2012 in their audit report relating to the financial statements for our Company are as follows:

- (i) The company has not maintained proper records and fails to provide sufficient appropriate evidence for the purpose of valuation of closing stock as per AS-2. So we have relied on the audited financials and Management Representation letter.
- (ii) The Company has charged depreciation on leasehold land prior to 31st March 2011 and accumulated depreciation has been carried forward to subsequent years and no depreciation has been charged in subsequent years.
- (iii) There is Income Related to Interest Subsidy of which no evidence has been made available to us so we have relied on audited financials in regards to its treatment.

- 29. *Our Company has made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.***

We have made an application with 'The Registrar of Trade Marks, Trade Marks Registry' for registration of trademark and the registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or will not be challenged or if granted registration, will not be invalidated or circumvented or will offer us any meaningful protection. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate. For further details of our trademarks, please see "Government and Other Approvals" on page 167.

- 30. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.***

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may

deteriorate over time, due to evolving business conditions. There can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud.

EXTERNAL RISKS

31. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The following external risks may have an adverse effect on our business and results of operations should any of them materialize:

- a change in the central or state governments or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular;
- high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins; and
- a slowdown in economic growth or financial instability in India could adversely affect our business and results of operations.

32. Our business is dependent on economic growth in India.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, economic slowdown elsewhere in the world or otherwise.

There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

33. There is uncertainty on the impact of currency demonetization in India on our business.

The Reserve Bank of India, or RBI, and the Ministry of Finance of the GoI withdrew the legal tender status of Rs. 500 and Rs. 1,000 currency notes pursuant to notification dated November 8, 2016. The short-term impact of these developments has been, among other things, a decrease in liquidity of cash in India. There is uncertainty on the long-term impact of this action. The RBI has also established, and continues to refine, a process for holders of affected banknotes to tender such notes for equivalent value credited into the holders' bank accounts. The short and long-term effects of demonetization on the Indian economy and our business are uncertain and we cannot accurately predict its effect on our business, results of operations and financial condition.

34. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including

those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

Additionally, the Government of India has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. In this regard, the Constitution (101 Amendment) Act 2016, which received Presidential assent on September 8, 2016, enables the Government of India and state governments to introduce GST. While the Government of India and certain state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we cannot provide you with any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

Further, the General Anti Avoidance Rules ("GAAR") is proposed to be effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

The impact of any changes to Indian legislation on our business cannot be fully determined at this time. Additionally, our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. Such unfavourable changes could decrease demand for our services and products, increase costs and/or subject us to additional liabilities. Any such changes could have an adverse effect on our business and financial results.

35. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our business.*

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

36. *The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition, including in the following respects:

- A natural or man-made disaster could result in damage to our assets or losses in our projects, or the failure of our counterparties to perform, or cause significant volatility in global financial markets.
- Pandemic disease, caused by a virus such as H5N1, the "avian flu" virus, the Ebola virus, or H1N1, the "swine flu" virus, could have a severe adverse effect on our business.
- Political tension, civil unrest, riots, acts of violence, situations of war or terrorist activities may result in disruption of services and may potentially lead to an economic recession and/or impact investor confidence.

Risks Related to the Issue

- 37. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Emerge Platform of NSE Limited may not develop or be sustained after the Issue. Our Company and the Lead Manager have appointed Guinness Securities Limited as Designated Market Maker for the Equity Shares of our Company. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the Emerge Platform of NSE Limited, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 38. You will not be able to immediately sell any of the Equity Shares you purchase in this Issue on the Emerge Platform of NSE Limited.***

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after the Equity Shares in this Issue have been allotted. Approval will require all other relevant documents authorizing the issue of the Equity Shares to be submitted. There could be failure or delays in listing the Equity Shares on the Emerge Platform of NSE Limited. Further, certain actions must be completed before the Equity Shares can be listed and trading can commence. Investors' "book entry", or "demat", accounts with Depository Participants are expected to be credited within three Working Days of the date on which the Basis of Allotment is approved by the Designated Stock Exchange. Thereafter, upon receipt of final approval from the Designated Stock Exchange, trading in the Equity Shares is expected to commence within 6 Working Days from Issue Closing Date.

We cannot assure you that the Equity Shares will be credited to the investors' demat account, or that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose of the Equity Shares.

- 39. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Following the Issue, our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by NSE Limited, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the NSE Limited based on the historical volatility in the price and trading volume of the Equity Shares.

NSE Limited is not required to inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell the Equity Shares or the price at which you may be able to sell the Equity Shares at any particular time.

- 40. There is no guarantee that the Equity Shares will be listed on the Emerge Platform of NSE in a timely manner or at all, and any trading closures at the NSE may adversely affect the trading price of the Equity Shares.***

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. In addition, we are required to deliver the Prospectus for registration to the Registrar of Companies under the Companies Act, 2013. We cannot assure you that the Registrar of Companies will register such Prospectus in a timely manner or at all. Approval requires all other relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of NSE Limited. Any delay in obtaining the approval would restrict your ability to dispose of the Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other

participants differ, in some cases significantly, from those in Europe and the U.S. The BSE and the NSE have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on the NSE could adversely affect the trading price of the Equity Shares.

41. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

42. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid to an Indian resident, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

43. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

44. *There may be less information available about companies listed on the Indian securities markets compared to information that would be available if we were listed on securities markets in certain other countries.*

There may be differences between the level of regulation and monitoring of the Indian securities markets and the activities of investors, brokers and other participants and that of the markets in the U.S. and certain other countries. SEBI regulates the Indian capital market (along with the Indian stock exchanges, which also govern the companies whose securities are listed with them) and has issued regulations and guidelines on disclosure requirements, insider trading, substantial acquisitions and takeovers of listed companies and other matters. There may, however, be less publicly available information about companies listed on an Indian stock exchange compared to information that would be available if that company was listed on a securities market in certain other jurisdictions.

Section III– Introduction

Summary of our Industry

This is only a summary and does not contain all the information that you should consider before investing in our Equity Shares. You should read this entire Draft Prospectus, including the information contained in the sections titled “Risk Factors” and “Financial Statements” and related notes beginning on page 12 and 120 respectively of this Draft Prospectus before deciding to invest in our Equity Shares.

Indian Economy

India has the fourth largest economy in the world by purchasing power parity. Against a background of global instability, India registered a growth of 7.6% during the financial year 2016, becoming the fastest growing major economy in the world. During the same period, macroeconomic parameters such as inflation, fiscal deficit and current account balance all exhibited signs of improvement. The financial year 2016 has also witnessed the launch of several government programs and initiatives designed to boost manufacturing, industrial growth, foreign direct investment and ease of doing business. Financial, insurance, real estate and professional services are estimated to have achieved double-digit growth for the financial year 2016. The industrial sector, broadly comprising mining, manufacturing, electricity and construction is estimated to have grown to 7.3% of India’s economy for the financial year 2016 from 5.9% for the financial year 2015.

Indian Forging Industry

The Indian forging industry has emerged as a major contributor to the manufacturing sector of the Indian Economy. It is a key element in the growth of the Indian automobile industry as well as other industries such as general engineering, construction equipment, oil, gas and power. The Indian forging industry is well recognised globally for its technical capabilities.

With an installed capacity of around 37.7 lakh MT, Indian forging industry has a capability to forge variety of raw materials like carbon steel, alloy steel, stainless steel, super alloy, titanium, aluminium, etc. Based on their installed capacity, the forging units may be classified as very large (capacity above 75,000 MT), large (capacity above 30,000 to 75,000 MT), medium (capacity above 12,500 to 30,000 MT), small (capacity above 5,000 to 12,500 MT) and very small (capacity up to 5,000 MT). Based on this classification it is seen that about 87% of the total number of units are small and very small, while only about 5% can be classified as very large and large units; the balance of about 8% constitute the medium sized units.

The Indian forging industry is concentrated around its end user customer locations. Therefore, the major forging clusters are found to be in the states of Maharashtra, Punjab, Gujarat, Tamil Nadu, Haryana, Delhi, Karnataka, Jharkhand, West Bengal and Andhra Pradesh. The forging industry of India provides direct employment to about 95,000 people. The small and very small units are mainly dependant on manual labour, however medium and large units are more mechanized. Quality standards in the industry have improved significantly and the sector is now well known globally for its high quality.

Current share of auto sector is about 61% of total forging production while the rest is with the non-auto sector. Changes in Indian automobile industry directly impact Indian forging industry, because the forging components form the backbone of the Indian automobile industry. Since the automobile industry is the main customer for forgings the industry’s continuous efforts in upgrading technologies and diversifying product range has enabled it to expand its base of customers to foreign markets.

The Indian forgings industry has made rapid strides and currently, not only meets almost all the domestic demand, but has also emerged as a large exporter of forgings. The industry is increasingly addressing opportunities arising out of the growing trend among global automotive OEM’s (Original Equipment Manufacturers) to outsource components from manufacturers in low-cost countries. As a result, the industry has been making significant contributions to country’s growing exports. In order to reduce the impact of cyclical and dependence on auto sector, the industry plans to diversify into non-automotive sectors.

Production and Installed Capacity of Indian Forging Industry:

| Year | Installed Capacity (Lakh Tonnes) | Total Production (Lakh Tonnes) | Capacity Utilization (Percentage) |
|---------|----------------------------------|--------------------------------|-----------------------------------|
| 2011-12 | 37.7 | 24.5 | 64.9 |
| 2012-13 | 37.7 | 21.1 | 55.9 |
| 2013-14 | 37.7 | 21.5 | 57.0 |
| 2014-15 | 37.7 | 23.0 | 61.0 |
| 2015-16 | 37.7 | 24.5 | 64.9 |

Key challenges/Issues of Forging Industry

Major challenges on domestic and export fronts that the forging industry is facing are as follows:

Domestic:

- Volatile international and domestic prices of forging quality steel
- Compliance with stringent environment norms.
- Inadequate backward/forward linkages.
- Difficulties associated with consolidation of capacities.
- High attrition rate, especially at the senior management level.
- High interest rates.

Exports:

- Impact of the volatile foreign exchange rates.
- Reluctance of the overseas buyers to compensate for the increased input cost in India
- Inadequate investment in technology upgradation.
- Cost competitiveness adversely affected due to constant cost escalation.

Growth Driver

The Indian forging industry needs to leverage the market opportunity through focused approach on increasing productivity, upgrade of technology rather than mere capacity expansion. The industry has to constantly look for opportunities to increase productivity. The future of the industry does not look as dismal as it was two-three years back. It will not be out of place to assume a growth rate of about 10 per cent from FY17 onwards. Today the global market demands high quality and consistency in production and there is a huge liability for failure. In this context, cheap labour does not have much relevance. Hence the forging industry is looking for automate production to achieve the above objectives. Several forging plants are being shut down in the developed nations and it is up to the Indian forging community to grab the opportunity.

Metal Pressing Industry

Metal pressing is a process of applying pressure on a sheet metal in order to achieve desired industry product. Metal pressing is done by either done by pressing or punching the metal sheet. Other processes in metal stamping involve flanging, blanking, blending embossing and other sheet metal forming processes. Metal is an imperative component of many manufacturing and end user industries. Steel, stainless steel, cast iron and aluminum are the basic components of automotive, aerospace, consumer appliances and the machinery industry. Metal stamping is thus, an imperative process having wide range of applications in the manufacturing as well as end user industries.

The rising competition in the automotive industry has led to the growth in demand for the global metal stamping market. In global metal stamping market, the desired shape of the metal is achieved by pressing or punching process with the help of stamping dies. The process of punching or the application of pressure can be done either manually or mechanically as per the requirement. Metals predominantly used in the global metal stamping market are aluminium, steel, brass, copper and stainless steel. Global metal stamping market is expected to grow with a single digit compound annual growth rate during the forecast period.

Industry-specific applications

Metal pressing can be applied to a variety of materials based on their unique metalworking qualities for a number of applications across a wide range of industries. Metal pressing may require the forming and processing of base common metals to rare alloys for their application specific advantages. Some industries require the electrical or thermal conductivity of beryllium copper in areas such as aerospace, electrical, and the defense industry or the high strength application of steel and its many alloys for the automotive industry. Industries metal stamping is used for Aerospace, Agriculture, Automotive, Marine, Power Tools, Construction etc.

Types of Metal Pressing

Hydraulic Presses

Hydraulic metal pressing relies heavily on the pressurization of the fluids contained in the machine's cylinders which provides the force for a powerful thrust. By sustaining and maintaining the hydraulic pressure, one can control the force of each hydraulic thrust throughout the entire operation. The vertical motion is known as the 'stroke length'. The idea behind force control for a vertical stroke is an important factor for metal pressing different materials. For instance, when working with materials which are complex or when doing drawing operations, force control for the entire stroke length and full power thrusts is vital for adequate formation. Force maintenance and full power abilities, not to mention the easy maintenance and reduced energy expenses, are some of the prime reason why metal stampers might switch to hydraulic pressing rather than its counterpart, the mechanical presses.

Mechanical Presses

Mechanical presses are different from hydraulic metal presses. In a majority of mechanical processes, flywheels which are steered by motors conserve energy that is then used to produce a thrusting motion. Due to the fact that flywheels consume energy with each mechanical 'downstroke' of the thrust, they tend to reduce their speeds. The energy created is then stored and released in time for the next metal pressing process to start. Mechanical stamping functions at high speeds, over 1000 strokes per minute, much faster than its counterpart. But the work strokes in this metal stamping process are considerably shorter, mainly because its full power is generated under the stroke.

But due to their high speed functioning, they are the most popular choice when it comes to mass metal pressing applications and jobs, where the parts being formed are either shallow or flat.

Market Driver

The increasing technological advancement and development in the automotive industry is the major driving force for the growth of metal stamping market. In case of an automobile, global metal stamping market finds its usage in side panels, brackets, bonnets, roofs, hangers, etc. The growing demand in consumer electronics, aerospace, electrical & electronics, engineering machinery, defence and telecommunication are some of the other driving factors for the growth of global metal stamping market. The evolution of metal stamping of next generation has generated a dynamic pull for the growth of global metal stamping market. In this, the usage of dies is optional thus it saves time and optimises the cost for the company. The increasing usage of other processes specially casting and forging during the formation of metal as they produce quality products and also have the flexibility in being used in the formation of heavy metals and also the high cost of raw materials are the challenges faced by the global metal stamping market.

| Particulars | Holding Levels as of March 31, 2016 | Holding Levels as of March 31, 2017(Estimated) | Holding Levels as of March 31, 2018(Estimated) |
|----------------------------|-------------------------------------|--|--|
| Inventories | | | |

| Consumables | 16 | 15 | 20 |
| Sundry Debtors | 32 | 36 | 38 |
| Current Liabilities | 30 | 25 | 15 |

Assumption for Working Capital requirements

| Particular | Assumptions made and justification |
|-----------------------|--|
| Current Assets | |
| Raw Material | The holding period for Raw Materials for the FY 2015-16 is 94 days whereas we estimated at a reasonable level of 75 days in the FY 2016-17 & 2017-18 as the raw material will be purchased in bulk quantity and the raw materials are of higher grade which has a higher lead time delivery. Therefore the holding period is acceptable considering the buffer stock requirement of basic raw materials for ensuring uninterrupted production. |
| Stock in process | The holding level of stock in process for the FY 2015-16 was 46 days. We have assumed the holding level of 43 and 51 days for the FY 2016-17 and 2017-18 for the purpose of our assessment of the limit in view of the time taken for conversion of Raw Material into Finished Goods. This may be considered as reasonable. |
| Consumables | The holding period of consumables for the FY 2015-16 was 16 days whereas we has been estimated at 15-20 days for the FY 2016-17 and 2017-18 as the consumables will be available locally. Therefore the holding period is considered acceptable. |
| Debtors | Our debtors days for the FY 2015-16 was 32 days. The company's product will have to vie with other existing brands in the market. The company has been selling their product to various corporate clients on credit. In line with the customs of the trade, the holding period of Receivables is estimated at 36 and 38 days for the FY 2016-17 and FY 2017-18 respectively, which is quite reasonable. |
| Creditors | The company generally purchases raw materials against cash payment to avail substantial discounts that add to its bottom-line. However, occasional credit period of 15-30 days is available in terms of the customs of the trade. In view of the same, the holding of sundry creditors for the FY 2015-16 was 30 days and has been estimated at 25 and 15 days in the FY 2016-17 and 2017-18 respectively which is reasonable and acceptable. |

Indian Forging Industry

The Indian forging industry has emerged as a major contributor to the manufacturing sector of the Indian Economy. It is a key element in the growth of the Indian automobile industry as well as other industries such as general engineering, construction equipment, oil, gas and power. The Indian forging industry is well recognised globally for its technical capabilities.

With an installed capacity of around 37.7 lakh MT, Indian forging industry has a capability to forge variety of raw materials like carbon steel, alloy steel, stainless steel, super alloy, titanium, aluminium, etc.

Based on their installed capacity, the forging units may be classified as very large (capacity above 75,000 MT), large (capacity above 30,000 to 75,000 MT), medium (capacity above 12,500 to 30,000 MT), small (capacity above 5,000 to 12,500 MT) and very small (capacity up to 5,000 MT). Based on this classification it is seen that about 87% of the total number of units are small and very small, while only about 5% can be classified as very large and large units; the balance of about 8% constitute the medium sized units.

The Indian forging industry is concentrated around its end user customer locations. Therefore, the major forging clusters are found to be in the states of Maharashtra, Punjab, Gujarat, Tamil Nadu, Haryana, Delhi, Karnataka, Jharkhand, West Bengal and Andhra Pradesh. States such as Maharashtra, Punjab, Tamil Nadu, Haryana, Jharkhand and Delhi.

The forging industry of India provides direct employment to about 95,000 people. The small and very small units are mainly dependant on manual labour, however medium and large units are more mechanized. Quality standards in the industry have improved significantly and the sector is now well known globally for its high quality.

Current share of auto sector is about 61% of total forging production while the rest is with the non-auto sector. Changes in Indian automobile industry directly impact Indian forging industry, because the forging components form the backbone of the Indian automobile industry. Since the automobile industry is the main customer for forgings the industry’s continuous efforts in upgrading technologies and diversifying product range has enabled it to expand its base of customers to foreign markets.

The Indian forgings industry has made rapid strides and currently, not only meets almost all the domestic demand, but has also emerged as a large exporter of forgings. The industry is increasingly addressing opportunities arising out of the growing trend among global automotive OEM’s (Original Equipment Manufacturers) to outsource components from manufacturers in low-cost countries. As a result, the industry has been making significant contributions to country’s growing exports.

In order to reduce the impact of cyclicity and dependence on auto sector, the industry plans to diversify into non-automotive sectors.

Metal Pressing Industry

Metal pressing is a process of applying pressure on a sheet metal in order to achieve desired industry product. Metal pressing is done by either done by pressing or punching the metal sheet. Other processes in metal stamping involve flanging, blanking, blending embossing and other sheet metal forming processes. Metal is an imperative component of many manufacturing and end user industries. Steel, stainless steel, cast iron and aluminum are the basic components of automotive, aerospace, consumer appliances and the machinery industry. Metal stamping is thus, an imperative process having wide range of applications in the manufacturing as well as end user industries.

The rising competition in the automotive industry has led to the growth in demand for the global metal stamping market. In global metal stamping market, the desired shape of the metal is achieved by pressing or punching process with the help of stamping dies. The process of punching or the application of pressure can be done either manually or mechanically as per the requirement. Metals predominantly used in the global metal stamping market are aluminium, steel, brass, copper and stainless steel. Global metal stamping market is expected to grow with a single digit compound annual growth rate during the forecast period. (source: <http://www.futuremarketinsights.com/reports/metal-stamping-market>)

Industry-specific applications

Metal pressing can be applied to a variety of materials based on their unique metalworking qualities for a number of applications across a wide range of industries. Metal pressing may require the forming and processing of base common metals to rare alloys for their application specific advantages. Some industries require the electrical or thermal conductivity of beryllium copper in areas such as aerospace, electrical, and the defense industry or the high strength application of steel and its many alloys for the automotive industry. Industries metal stamping is used for Aerospace, Agriculture, Automotive, Marine, Power Tools, Construction etc.(Wikipedia)

Types of Metal Pressing

Hydraulic Presses

Hydraulic metal pressing relies heavily on the pressurization of the fluids contained in the machine's cylinders which provides the force for a powerful thrust. By sustaining and maintaining the hydraulic pressure, one can control the force of each hydraulic thrust throughout the entire operation. The vertical motion is known as the 'stroke length'. The idea behind force control for a vertical stroke is an important factor for metal pressing different materials. For instance, when working with materials which are complex or when doing drawing operations, force control for the entire stroke length and full power thrusts is vital for adequate formation. Force maintenance and full power abilities, not to mention the easy maintenance and reduced energy expenses, are some of the prime reason why metal stampers might switch to hydraulic pressing rather than its counterpart, the mechanical presses.

Mechanical Presses

Mechanical presses are different from hydraulic metal presses. In a majority of mechanical processes, flywheels which are steered by motors conserve energy that is then used to produce a thrusting motion. Due to the fact that flywheels consume energy with each mechanical 'downstroke' of the thrust, they tend to reduce their speeds. The energy created is then stored and released in time for the next metal pressing process to start. Mechanical stamping functions at high speeds, over 1000 strokes per minute, much faster than its counterpart. But the work strokes in this metal stamping process are considerably shorter, mainly because its full power is generated under the stroke.

But due to their high speed functioning, they are the most popular choice when it comes to mass metal pressing applications and jobs, where the parts being formed are either shallow or flat.

Market Driver

The increasing technological advancement and development in the automotive industry is the major driving force for the growth of metal stamping market. In case of an automobile, global metal stamping market finds its usage in side panels, brackets, bonnets, roofs, hangers, etc. The growing demand in consumer electronics, aerospace, electrical & electronics, engineering machinery, defence and telecommunication are some of the other driving factors for the growth of global metal stamping market. The evolution of metal stamping of next generation has generated a dynamic pull for the growth of global metal stamping market. In this, the usage of dies is optional thus it saves time and optimises the cost for the company. The increasing usage of other processes specially casting and forging during the formation of metal as they produce quality products and also have the flexibility in being used in the formation of heavy metals and also the high cost of raw materials are the challenges faced by the global metal stamping market.

Heat Treatment

Heat treatment is very critical process to achieve all the required properties of the forged piece. We are carrying out various types of heat treatments like normalizing, hardening. All heat treatment cycles are properly recorded with time temperature charts. After completion of heat treatments we carry out various testing like hardness, physical testing to ensure all the required properties are met.

Quality Control and Inspection

Our Company has in-house quality control and inspection facilities. It has the required equipments to check forging, on various parameters including physical, chemical and impact tests, which ensure delivery of quality products.

Manufacturing Process:

The major raw materials are Cold Roll Coil (CR Coil), Hot Roll Coil (HR Coil), billets, steel pipes & tubes and is purchased locally. After receiving the raw materials, visual and dimensional check of raw material is done.

Press for sheet Metal Process

Pressing is the process of placing flat sheet metal in either blank or coil form into a stamping press where a tool and die surface forms the metal into a net shape. Pressing includes a variety of sheet-metal forming manufacturing processes, such as punching using a machine press or stamping press, blanking, embossing, bending etc. This could be a single stage operation where every stroke of the press produces the desired form on the sheet metal part, or could occur through a series of stages. The process is carried out on sheet metal.

Forging Processes

Forging changes the size and shape, but not the volume, of a part. The change is made by force applied to the hot material so that it stretches beyond the yield point. The force must be strong enough to make the material deform. The yield point is reached when the material will reform into a new shape. The point at which the material would be destroyed is called the fracture point. In forging, a block of metal is deformed under impact or pressure to form the desired shape. Most metals are hot forged. These temperatures cause deformation, in which the grains of the metal elongate and assume a fibrous structure of increased strength along the direction of flow.

In Hammer forging the shaping of a metal or other material, by an instantaneous application of pressure to a relatively small area. A hammer or ram, delivering intermittent blows to the section to be forged, applies this pressure. The hammer is dropped from its maximum height, usually raised by steam or air pressure. Hammer forging can produce a wide variety of shapes and sizes and, if sufficiently reduced, can create a high degree of grain refinement at the same time.

Heat treatment

Materials can be improved before or after manufacturing by different heat treatment processes. Forging is usually performed to hot metals, allowing for smoother flow and easier deformation. Steel is heated to varying temperatures, depending on the carbon content and customer's requirement. Depending on the amount of work required to the piece, it may be necessary to reheat the piece one or more times. The temperature of the metal when completely forged is called the finishing temperature. After forging, the material must be cooled uniformly and protected from moisture or cold air.

Normalizing: Normalizing is done to improve the crystalline structure of the steel, thus obtaining superior properties. Heating the forged part just beyond the critical temperature and then allowing it to air-cool completes normalizing. This allows the grain-size to be refined and, if not held at that temperature too long, will result in a newly formed crystalline structure. The internal stresses, if any, will be relieved, hardened steels will be softened, overheated steels will have a more favorable, normal fine-grained structure, and structural distortion will be removed.

Hardening: Hardening of steels can also be done after forging. The workpiece is heated slowly, to obtain the finest grain-sizes, to its hardening temperature - much higher than annealing temperatures. The metal is kept at this temperature only until uniform heat distribution and completion of the thermal transformation. Prolonged exposure at these elevated temperatures will result in increased grain growth and surface decarbonization, if no protection from oxidation is provided. Oxidation can be avoided by surrounding the metal with some material that will use up the oxygen that is present in the furnace. Once the metal has been uniformly heated to temperature, it is removed from the furnace and placed directly into a quenching tank. This rapidly cools the metal and the metal retains its new qualities.

Machining

The forged part requires machining in accordance with the requirement of the customers. CNC machines do machining before the components are delivered. After heat treatment, the rough forged products are machined by means of chipping Removal machines, lathes and CNC machines.

Inspection

The parameters included in inspection includes visual inspection, dimensional inspection of components including surface finish, hardness etc. After inspection the products are ready for packing. The finished products are packed as per customer requirements.

Tax Related Legislations

Central Sales Tax Act, 1956

The CST Act formulates principles for determining (a) when a sale or purchase takes place in the course of interstate trade or commerce; (b) when a sale or purchase takes place outside a State and (c) when a sale or purchase takes place in the course of imports into or export from India. This Act provides for levy, collection and distribution of taxes on sales of goods in the course of inter-state trade or commerce and also declares certain goods to be of special importance in inter-State trade or commerce and specifies the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance (called as declared goods) shall be subject. Central Sales tax is levied on inter State sale of goods. Sale is considered to be inter-state when (a) sale occasions movement of goods from one State to another or (b) is effected by transfer of documents during their movement from one State to another. A sale or purchase of goods shall be deemed to take place in the course of inter-state trade or commerce if the sale or purchase is affected by a transfer of documents of title to the goods during their movement from one state to another. When the goods are handed over to the carrier, he hands over a receipt to the seller. The seller sends the receipt to buyer. The buyer gets delivery of goods on submission of the receipt to the carrier at other end. The receipt of carrier is ‘document of title of goods’. Such document is usually called Lorry Receipt (LR) in case of transport by Road or Air Way Bill (AWB) in case of transport by air. Though it is called Central Sales Tax Act, the tax collected under the Act in each State is kept by that State only. Central Sales Tax is payable in the State from which movement of goods commences (that is, from which goods are sold). The tax collected is retained by the State in which it is collected. The Central Sales Tax Act is administered by sales tax authorities of each State. The liability to pay tax is on the dealer, who may or may not collect it from the buyer.

Restrictions on Foreign Ownership of Indian Securities

Foreign investment in Indian securities is regulated primarily through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP, issued the consolidated FDI Policy by way of circular no. D/o IPP F. No. 5(1)/2016-FC-1 dated June 7, 2016 (“**FDI Policy**”), which with effect from June 7, 2016, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 6, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (“**FDI**”) Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, OCBs cannot participate in the Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act, or any state securities laws in the United States, and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws in the United States.

Accordingly, the Equity Shares are being offered and sold outside the United States in offshore transactions in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the number of Equity Shares Applied for do not exceed the applicable limits under laws or regulations.
