Prior to making an investment decision, prospective investors should carefully consider all of the information contained in this Draft Prospectus, including the sections titled "Our Business", "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the "Financial Information" included in this Draft Prospectus beginning on pages 63, 122 & 107 respectively. The occurrence of any of the following events could have a material adverse effect on our business, results of operation, financial condition and prospects and cause the market price of the Equity Shares to fall significantly.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein.

Materiality

The risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality:

- *Some events may not be material individually, but may be found material collectively.*
- *Some events may have material impact qualitatively instead of quantitatively.*
- *Some events may not be material at present but may have material impact in the future.*

The risk factors are as envisaged by the management. Wherever possible, the financial impact of the risk factors has been quantified.

INTERNAL RISK FACTORS

1. **Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.**

We employ significant number of employees. We are unable to assure you that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock - outs or increased wage demands. Such issues could have an adverse effect on our business, and results of operations.

2. **The insurance coverage taken by our Company may not be adequate to protect against certain business risks. This may adversely affect our financial condition and result of operations.**

Operating and managing a business involves many risks that may adversely affect our Company's operations, and the availability of insurance is therefore important to our operations. Our Company believes that our insurance coverage is generally consistent with industry practice. However, to the extent that any uninsured risks materialize or if it fails to effectively cover itself for any risks, we could be exposed to substantial costs and losses that would adversely affect financial condition. In addition, our Company cannot be certain that the coverage will be available in sufficient amounts to cover one or more large claims, or that our insurers will not disclaim coverage as to any claims. A successful assertion of one or more large claims against our Company that exceeds our available insurance coverage or that leads to adverse changes in our insurance policies, including premium increases or the imposition of a large deductible or coinsurance requirement, could adversely affect our financial condition and results of operations.

6. Our revenues depend upon the award of new contracts. Consequently, our failure to win new contracts will adversely affect our results of operations and our cash flows may fluctuate materially from period to period.

Our revenues are derived primarily from contracts awarded to us on a project-by-project basis. Generally, it is very difficult to predict whether and when we will be awarded a new contract since many potential contracts involve a lengthy and complex bidding and selection process that may be affected by a number of factors, including changes in existing or assumed market conditions, financing arrangements, technical and financial qualifications, governmental approvals and environmental matters. Because our revenues are derived primarily from these contracts, our results of operations and cash flows may be adversely affected or fluctuate materially from period to period depending on our ability to win new contracts.

The uncertainty associated with the award of new contracts may increase our cost of doing business. For example, we may decide to maintain and bear the cost of a workforce in excess of our current contract needs in anticipation of future contract awards. If an expected contract award is delayed or not received, we could incur costs in maintaining an idle workforce that may have a material adverse effect on our results of operations.

7. Projects included in our order book may be changed, delayed, cancelled or not fully paid for by our clients, which could materially harm our cash flow position, revenues or profits.

The future earnings related to the performance of the work in our order book may not be realized. Although projects in our order book represent business that we may consider firm on the date of such order book, cancellations, delays or scope adjustments may occur. Due to changes that may occur in project scope and schedule, we cannot predict with certainty when or if the projects in our order book will be completed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to pay amounts owed or dispute the amounts owed to us. Any delay, cancellation or payment default could materially harm our cash flow position, revenues and profits, and adversely affect the trading price of the Equity Shares.

8. Our registered office is under renovation for time-being and we have temporarily shifted our administrative activities at F-33, Basement, East of Kailash, New Delhi-110065.

While we own our registered office which is situated at D-2, 1st Floor, Amar Colony, Lajpat Nagar IV, New Delhi-110024. We have commenced certain renovation activities at our registered office and for administrative convenience we have temporarily shifted our administrative activities at F-33, Basement, East of Kailash, New Delhi-110065. Any delay in completion of renovation activities will force ourselves to carry out our administrative operations from F-33, Basement, East of Kailash, New Delhi-110065.

9. We operate in highly competitive businesses and increased competitive pressure may adversely affect our results of operations.

We operate in highly competitive businesses. Our contracts are entered into primarily through a competitive bidding process and certain contracts are entered into on the basis of negotiations with the client. Our competition varies depending on the size, nature and complexity of the project and on the geographical region in which the project is to be executed. We compete against various multinational and

national companies as well as regional organized and unorganized entities. In selecting contractors for projects, clients generally limit the tender to contractors they have pre-qualified based on technical and financial criteria, such as experience, technical ability, past performance, reputation for quality, safety record, financial strength and the size of previous contracts executed in similar projects with them or otherwise. Our ability to meet the qualification criteria in our various business areas is critical to being considered for any project. Additionally, while these are important considerations, price is a major factor in most tender awards and in negotiated contracts and our business is subject to intense price competition. Our competitors may be larger and may have better access to financial resources. Some of our competitors may be better known in regional markets in which we compete. Our inability to compete successfully in the businesses in which we operate could materially and adversely affect our business prospects and results of operations.

- 10. We depend on the adequate and timely supply of materials and bought-out items at commercially acceptable prices. Any disruptions, delay or increase in prices of such material and bought-out items could have a material adverse effect on our business.**

Our business is significantly affected by the availability, cost and quality of materials and bought-out items that we require to construct, develop and complete our projects and services. The price and supply of materials, equipment and bought-out items depend on factors not under our control, including domestic and international economic conditions, competition, availability of quality suppliers, production levels, transportation costs and import, value added and government duties and taxes. Any of such events could have a material adverse effect on our business and results of operations.

- 11. We are dependent on our management team for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.**

Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

- 12. We have substantial indebtedness and will continue to have debt service obligations following the Issue. The total amounts outstanding and payable by our Company as principal and interest were Rs. 694.41 Lacs as on 31st December, 2013.**

- 14. We have taken unsecured loan of Rs. 492.59 Lacs as on 31st December, 2013, which is repayable on demand. In case of untimely demand, we will have to arrange these funds which may carry higher cost of funding, which may have an impact on our financial operations.**

We have taken unsecured loan of Rs. 492.59 Lacs as on 31st December, 2013 from our Promoter and Group Companies, which can be recalled at any time and in that event, it may affect the financial operations of our Company to that extent.

17. We have entered into certain related party transactions and may continue to do so.

We have entered into related party transactions with our Promoters, Group Company, Directors. While we believe that all such transactions have been conducted on the arm's length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future. For details of these transactions, please refer to section titled "Related Party Transactions" at page 105 of this Draft Prospectus.

18. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2009 appointment of monitoring agency is required only for Issue size above Rs. 50,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

19. We have high working capital requirements. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on our results of operations

Our business requires a substantial amount of working capital. In many cases, working capital is required to finance the purchase of materials and execution of work on projects before payment is received from clients. Our working capital requirements may increase if, in certain contracts, payment terms do not provide for advance payments to us or if payment schedules are less favorable to us. We may need to borrow additional funds in the future to fulfill our working capital needs. Continued increases in working capital requirements may have an adverse effect on our financial condition and results of operations.

- 20. Accidents at the site where we operate may lead to public liability consequences. Further, our revenue could be diminished if we are associated with negative publicity.**

Occurrence of accidents at the site wherein we execute our work order, may expose our Company to pay compensation and penalty to our workmen and third parties for any losses or damage to human life/health or the environment. Further, our revenue could be diminished if we are associated with negative publicity.

- 21. It may be difficult for us to recruit and retain highly skilled technical personnel that are necessary for our business in order to remain competitive.**

Competition for highly skilled technical personnel in engineering operations are intense. We believe that our future success depends largely on our continued ability to hire, assimilate, retain and leverage the skills of qualified engineers and other highly-skilled personnel needed to effective and timely execution of our work orders. We may not be as successful as our competitors at recruiting, assimilating, retaining and utilizing these highly-skilled personnel. If we are unable to recruit and retain qualified personnel with the requisite experience, our growth and competitive position will be adversely affected.

- 22. Delay in raising funds from the IPO could adversely impact the implementation schedule.**

The proposed expansion, as detailed in the section titled "*Objects of the Issue*" is to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

- 23. The Company has not appointed any independent agency for the appraisal of the proposed Project.**

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project expenditure and may have an adverse impact on our business, financial condition and results of operations.

- 24. Our trademark is not registered under the Trade Marks Act our ability to use the trademark may be impaired.**

Our company's business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not have a registered trademark over our name and logo under the Trade Marks Act and consequently do not enjoy the statutory protections accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection. Our Company has made application for registration of logo. We cannot guarantee that all the pending application will be decided in the favor of the Company. If our trademarks are not registered it can allow any person to use a deceptively similar mark and market its product which could be similar to the products offered by us. Such infringement will hamper our business as prospective clients may go to such user of mark and our revenues may decrease.

- 25. The new Companies Act, 2013 is in the process of being implemented and any developments in the near future may be material with respect to the disclosures to be made in this Draft Prospectus as well as other rules and formalities for completing the Issue.**

The Companies Act, 2013 has been published on August 29, 2013. Section 1 of the said Act was notified on August 30, 2013, while 98 more sections were notified as on September 12, 2013, section 135 and rules thereunder on 27/02/2014. The Ministry of Company Affairs has further notified 183 sections of the Act and Rules thereunder to be made effective from 01.04.2014. Though we have incorporated the relevant details pertaining to the new Companies Act, 2013 (to the extent notified) in this Draft Prospectus, any further notifications by the MCA after our filing of this Draft Prospectus may be material with respect to the disclosures to be made in the Prospectus as well as other rules and formalities for completing the Issue. The Companies Act, 2013 is expected to replace the existing Companies Act, 1956. The Companies Act, 2013 provides for, among other things, changes to the regulatory framework governing the issue of capital by companies, corporate governance, audit procedures, corporate social responsibility, and the requirements for independent directors, director's liability, class action suits, and the inclusion of women directors on the boards of companies. The Companies Act, 2013 is expected to be complemented by a set of rules that shall set out the procedure for compliance with the substantive provisions of the Companies Act, 2013. In the absence of such rules, it is difficult to predict with any degree of certainty the impact, adverse or otherwise, of the Companies Act, 2013 on the Issue, and on the business, prospects and results of operations of the Company.

EXTERNAL RISK FACTORS

26. Political, economic and social changes in India could adversely affect our business.

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

27. Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.

The revenues recorded and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

28. Natural calamities and force majeure events may have an adverse impact on our business.

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

29. Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Our Company may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, the IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 ("IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 32 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. We have not yet determined with certainty what impact the adoption of IFRS will have on our financial reporting. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially

different under IFRS than under Indian GAAP or our adoption of IFRS may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period.

30. Restrictions on foreign investment limit our ability to raise debt or capital outside India.

Indian laws constrain our ability to raise capital outside India through the issuance of equity or convertible debt securities and restrict the ability of non-Indian companies to invest in us. Foreign investment in, or an acquisition of, an Indian company requires approval from the relevant government authorities in India, including the Reserve Board of India and the Foreign Investment Promotion Board.

31. Any downgrading of India's debt rating by a domestic or international rating agency could negatively impact our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

32. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may adversely affect the Indian markets on which our Equity Shares will trade. These acts may result in a loss of business confidence, make travel and other services more difficult and have other consequences that could have an adverse effect on our business. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of our Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our Equity Shares.

33. Third party statistical and financial data in this Draft Prospectus may be incomplete or unreliable.

We have not independently verified any of the data from industry publications and other sources referenced in this Draft Prospectus and therefore cannot assure you that they are complete or reliable. Discussions of matters relating to India, its economies or the industries in which we operate in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

RISKS RELATING TO THE EQUITY SHARES

34. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

35. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

- 36. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.**

Prior to the offer, there has been no public market for our Equity Shares, and an active trading market on the SME Platform of BSE. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the engineering and power sector in India and volatility in the Exchange and securities markets elsewhere in the world. However, the LM will arrange for compulsory market making for a period of 3 years from the date of listing as per the regulations applicable to the SME Platforms under SEBI (ICDR) Regulations, 2009.

- 37. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.**

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 38. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.**

Prior to this Issue, there has been no public market for our Equity Shares. Guinness Securities Limited is acting as Designated Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the section titled "*General Information - Details of the Market Making Arrangement for this Issue*" on page 32 of this Draft Prospectus.

- 39. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.**

Following the Issue, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to

sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

INDUSTRY OVERVIEW

Overview of the Global Economy and Indian Economy

A. Global Economy

The global economy grew by approximately 2.9% in 2013, its slowest rate since 2009. However, prospects for 2014 look brighter with robust growth forecast in large developed economies such as Germany, Japan, the United Kingdom and the United States. Because of their scale, a recovery in these economies is likely to boost global growth to 3.6% in 2014, accelerating to 4.0% in 2015. Having contracted marginally in 2013, the eurozone is expected to return to growth, although the outlook remains tricky with debt levels continuing to rise, especially in troubled southern Europe. Growth in developing economies as a whole slowed in 2013, but they are still expected to expand faster than developed economy peers in 2014. The economies of developing Asia, led by China, India and Indonesia, are expected to grow by 6.5% in 2014. 4. Strong growth is also forecast in Sub-Saharan Africa and the Middle East, and North Africa is expected to rebound after a tough 2013 complicated by the fallout from the Arab Spring. B. Indian Economy

India's growth is expected to recover from 4.4 per cent in 2013 to 5.4 per cent in 2014, supported by slightly stronger global growth, improving export competitiveness and implementation of recently approved investment projects. A pick-up in exports in recent months and measures to curb gold imports have contributed to lowering the current account deficit. Policy measures to bolster capital flows have further helped reduce external vulnerabilities. Overall growth is expected to firm up on policies supporting investment and a confidence boost from recent policy actions, but will remain below trend. Consumer price inflation is expected to remain an important challenge, but should continue to move onto a downward trajectory. The outlook also projected India's growth rate to increase to 6.4 per cent in 2015. In 2012, India's growth rate stood at 4.7 per cent. For India, real GDP growth is projected to strengthen to 5.4 per cent in 2014 and 6.4 per cent in 2015, assuming that government efforts to revive investment growth succeed and export growth strengthens after the recent rupee depreciation. In India, further tightening of the monetary stance might be needed for a durable reduction in inflation and inflation expectations. Continued fiscal consolidation will be essential to lower macroeconomic imbalances. Policymakers in India must also concentrate on structural reforms to support investment, which has slowed markedly. Priorities include market-based pricing of natural resources to boost investment, addressing delays in the implementation of infrastructure projects, improving policy frameworks in the power and mining sectors, reforming the extensive network of subsidies, and securing passage of the new goods and services tax to underpin medium term fiscal consolidation. Overview of Consultancy Services in India

Consultancy is a practice of giving expert advice within a particular field by professionals or experts who advice in a particular area and has wide knowledge, well experienced, problem solving skill and is expertise of the subject matter.

- **Construction Consulting**

Construction consulting is a specialized form of business consultation that focuses on all forms of construction, most notably building construction. When companies, especially large ones, need to build new installations and factories, they need conceptual planning, phasing, sequencing, and construction services.

The primary goal of any build is to end up with high-quality product while remaining within budget and on schedule. In today's construction market, this is a nearly impossible task without the professionals specialized in accomplishing it. The specific services provided by these professionals includes, but are not

limited to, project planning, risk management, construction management, schedule delay analysis, construction cost estimates, construction claims, expert testimony, and litigation support.

- **Engineering Consulting -**

A city might need a new bridge across a river, for which design and building plans would be required, a new factory with multiple automated assembly lines might need to be constructed, an engine might need to be designed for a new aircraft, or a helipad might need to be built atop a 100-storey building. Engineering Consultants would be employed for such assignments.

The Indian Infrastructure Opportunity

The Indian economy is based on planning through successive five year plans that set out targets for economic development in various sectors, including the infrastructure sector. The XIth Five Year Plan ("FYP") aims at a sustainable GDP growth rate of 9.00%, but there is general consensus that infrastructure inadequacies would constitute a significant constraint in realizing this development potential. To overcome this constraint, an ambitious programme of infrastructure investment, involving both public and private sector, is being developed for the XIth FYP. Infrastructure spending targets for the XIth FYP were revised from approximately 4.60% to approximately 7.60% of GDP representing an increase of over 140.00% compared to the Xth FYP.

Overview of the Indian Power Sector

The power sector in India is slowly moving from a regulated return framework to a market driven pricing mechanism. This has provided a major boost for private entrepreneurs to enter the power sector and set up projects. Currently significant traction has been achieved in the generation space, while the transmission and the distribution segment is slowly opening to the private sector. (Source: Ministry of Power).

HYDROPOWER

Hydropower is a renewable energy resource because it uses the Earth's water cycle to generate electricity. Water evaporates from the Earth's surface, forms clouds, precipitates back to earth, and flows toward the ocean. The movement of water as it flows downstream creates kinetic energy that can be converted into electricity. 2700 TWH is generated every year. Hydropower supplies at least 50% of electricity production in 66 countries and at least 90% in 24 countries. Out of the total power generation installed capacity in India of 1,76,990 MW (June, 2011), hydro power contributes about 21.5% i.e. 38,106 MW. A capacity addition of 78,700 MW is envisaged from different conventional sources during 2007-2012 (the 11th Plan), which includes 15,627 MW from large hydro projects. In addition to this, a capacity addition of 1400 MW was envisaged from small hydro up to 25 MW station capacity. The total hydroelectric power potential in the country is assessed at about 150,000 MW, equivalent to 84,000 MW at 60% load factor. The potential of small hydro power projects is estimated at about 15,000 MW.

In such a case, the cost of such long-term specified asset will not qualify for deduction under section 80C of the Act. However, if the assessee transfers or converts the long-term specified asset into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long-term capital gains in the year in which the long-term specified asset is transferred or converted into money.

Overview of the Global Economy and Indian Economy

B. Global Economy

The global economy grew by approximately 2.9% in 2013, its slowest rate since 2009. However, prospects for 2014 look brighter with robust growth forecast in large developed economies such as Germany, Japan, the United Kingdom and the United States. Because of their scale, a recovery in these economies is likely to boost global growth to 3.6% in 2014, accelerating to 4.0% in 2015. Having contracted marginally in 2013, the eurozone is expected to return to growth, although the outlook remains tricky with debt levels continuing to rise, especially in troubled southern Europe. Growth in developing economies as a whole slowed in 2013, but they are still expected to expand faster than developed economy peers in 2014. The economies of developing Asia, led by China, India and Indonesia, are expected to grow by 6.5% in 2014. 4. Strong growth is also forecast in Sub-Saharan Africa and the Middle East, and North Africa is expected to rebound after a tough 2013 complicated by the fallout from the Arab Spring. (Sources: Grant Thornton International Business Report)

Business growth prospects

Global business optimism remained fairly consistent in 2013, averaging net 28% across the year. However the contrast with the previous year is striking: 2012 average optimism stood at 12% and just 4% of business leaders expressed optimism in the economic outlook for 2013, compared to 27% for 2014. Interestingly, while G7 business leaders grew more confident as 2013 progressed (up 44 percentage points), optimism in the BRIC economies has slowly been eroded (down 17 pp). Globally, the most optimistic regions are Southeast Asia (45%) and the Nordics (39%)

B. Indian Economy

India's growth is expected to recover from 4.4 per cent in 2013 to 5.4 per cent in 2014, supported by slightly stronger global growth, improving export competitiveness and implementation of recently approved investment projects. A pick-up in exports in recent months and measures to curb gold imports have contributed to lowering the current account deficit. Policy measures to bolster capital flows have further helped reduce external vulnerabilities. Overall growth is expected to firm up on policies supporting investment and a confidence boost from recent policy actions, but will remain below trend. Consumer price inflation is expected to remain an important challenge, but should continue to move onto a downward trajectory. The outlook also projected India's growth rate to increase to 6.4 per cent in 2015. In 2012, India's growth rate stood at 4.7 per cent. For India, real GDP growth is projected to strengthen to 5.4 per cent in 2014 and 6.4 per cent in 2015, assuming that government efforts to revive investment growth succeed and export growth strengthens after the recent rupee depreciation. In India, further tightening of the monetary stance might be needed for a durable reduction in inflation and inflation expectations. Continued fiscal consolidation will be essential to lower macroeconomic imbalances.

Policymakers in India must also concentrate on structural reforms to support investment, which has slowed markedly. Priorities include market-based pricing of natural resources to boost investment, addressing delays in the implementation of infrastructure projects, improving policy frameworks in the power and mining sectors, reforming the extensive network of subsidies, and securing passage of the new goods and services tax to underpin medium term fiscal consolidation. Overview of Consultancy Services in India

Consultancy is a practice of giving expert advice within a particular field by professionals or experts who advice in a particular area and has wide knowledge, well experienced, problem solving skill and is expertise of the subject matter.

- **Construction Consulting**

Construction consulting is a specialized form of business consultation that focuses on all forms of construction, most notably building construction. When companies, especially large ones, need to build new installations and factories, they need conceptual planning, phasing, sequencing, and construction services.

The primary goal of any build is to end up with high-quality product while remaining within budget and on schedule. In today's construction market, this is a nearly impossible task without the professionals specialized in accomplishing it. The specific services provided by these professionals includes, but are not limited to, project planning, risk management, construction management, schedule delay analysis, construction cost estimates, construction claims, expert testimony, and litigation support.

- **Engineering Consulting -**

A city might need a new bridge across a river, for which design and building plans would be required, a new factory with multiple automated assembly lines might need to be constructed, an engine might need to be designed for a new aircraft, or a helipad might need to be built atop a 100-storey building. Engineering Consultants would be employed for such assignments.

The Indian Infrastructure Opportunity

The Indian economy is based on planning through successive five year plans that set out targets for economic development in various sectors, including the infrastructure sector. The XIth Five Year Plan ("FYP") aims at a sustainable GDP growth rate of 9.00%, but there is general consensus that infrastructure inadequacies would constitute a significant constraint in realizing this development potential. To overcome this constraint, an ambitious programme of infrastructure investment, involving both public and private sector, is being developed for the XIth FYP. Infrastructure spending targets for the XIth FYP were revised from approximately 4.60% to approximately 7.60% of GDP representing an increase of over 140.00% compared to the Xth FYP.

The programme strengthens and consolidates recent infrastructure initiatives, such as the Bharat Nirman for building rural infrastructure, as well as sectoral initiatives, such as the National Highways Development Programme (NHDP), the Airport Financing Plan, the National Maritime Development Programme (NMDP) and the Jawaharlal Nehru National Urban Renewal Mission (JNNURM). Given the scale of infrastructure spending, the Government of India is encouraging private sector participation through Public Private Partnership (PPP) projects. The Government of India has also set up the Ministry of New and Renewable Energy (MNRE) as the nodal agency for all matters relating to new and renewable energy. (Source: MNRE - www.mnre.gov.in)

Overview of the Indian Power Sector

The power sector in India is slowly moving from a regulated return framework to a market driven pricing mechanism. This has provided a major boost for private entrepreneurs to enter the power sector and set up projects. Currently significant traction has been achieved in the generation space, while the transmission and the distribution segment is slowly opening to the private sector. (Source: Ministry of Power).

HYDROPOWER

Hydropower is a renewable energy resource because it uses the Earth's water cycle to generate electricity. Water evaporates from the Earth's surface, forms clouds, precipitates back to earth, and flows toward the ocean. The movement of water as it flows downstream creates kinetic energy that can be converted into electricity. 2700 TWh is generated every year. Hydropower supplies at least 50% of electricity production in 66 countries and at least 90% in 24 countries. Out of the total power generation installed capacity in India of 1,76,990 MW (June, 2011), hydro power contributes about 21.5% i.e. 38,106 MW. A capacity addition of 78,700 MW is envisaged from different conventional sources during 2007-2012 (the 11th Plan), which includes 15,627 MW from large hydro projects. In addition to this, a capacity addition of 1400 MW was envisaged from small hydro up to 25 MW station capacity. The total hydroelectric power potential in the country is assessed at about 150,000 MW, equivalent to 84,000 MW at 60% load factor. The potential of small hydro power projects is estimated at about 15,000 MW.

Potential in India

India is blessed with immense amount of hydro-electric potential and ranks 5th in terms of exploitable hydro-potential on global scenario. As per assessment made by CEA, India is endowed with economically exploitable hydro-power potential to the tune of 148700 MW of installed capacity. The basin wise assessed potential is as under:-

Basin/Rivers Probable	Installed Capacity (MW)
Indus Basin	33,832
Ganga Basin	20,711
Central Indian River system	4,152
Western Flowing Rivers of southern India	9,430
Eastern Flowing Rivers of southern India	14,511
Brahmaputra Basin	66,065
Total	1,48,701

In addition, 56 number of pumped storage projects have also been identified with probable installed capacity of 94 000 MW. In addition to this, hydro-potential from small, mini & micro schemes has been estimated as 6 782 MW from 1 512 sites. Thus, in totality India is endowed with hydro-potential of about 2 50 000 MW.

Advantages of Hydro power:

- Renewable source of energy
- Relatively environment friendly
- Ability for instantaneous starting, stopping and load variation thereby ideally suited for peaking operation
- Long useful life span well over 50 years
- No fuel cost during the life of the station
- Emerges to be the most economical source of power in long run
- Because of Hydro projects there is development & up gradation of infrastructure and communication systems in the remote locations.
- Storage projects provide flood moderation, irrigation, drinking water supply, recreation facilities etc. and thus help in the maximum utilization of our scarce water resources.

Disadvantages of Hydro Power:

- Ecosystem damage and loss of land
- Siltation
- Flow shortage
- Methane emissions (from reservoirs)
- Relocation
- Failure hazard

Small Hydro Power (SHP):

It is recognized that small hydro power projects can play a significant role in meeting energy requirements in remote and hilly areas where extension of grid is uneconomical. Small hydro can contribute in capacity addition of hydropower in relatively short time frame.

Small Hydro Power Programme:

Potential	About 20,000 MW
Identified Potential	19749 MW
Installed Capacity	3632 MW (18%)
2007-2012 Target	1400 MW
11 th Plan Achievement so far	1419 MW
Average Capacity addition per year	300 MW

Measures to accelerate Hydro Power Development:

- The States should be encouraged for renovation and refurbishment of old and less efficient Hydro plants which will bring better efficiency and best utilization of resources
- Hydro Projects irrespective of size should be treated as renewable projects and should be given incentives
- Government should encourage and support private players
- Lack of long term finance for hydro projects should be resolved
- Upfront Payment and additional free energy to State Government should be recognized as a part of project cost.

Way forward:

Recent grid disturbances have shown importance of peaking power where Hydro Power is ideally suited. Also in wake of issues of fuel supply with thermal power plants, intermittent power supply from wind and solar power tariffs on the higher side, Hydro Power is a reliable and good quality power at affordable cost. Government of India is vigorously promoting large scale development of hydro power in India through changes in policies, all driven to involve greater private entrepreneurs. The major issues plaguing the hydro power sector have been identified and policy changes to mend these barriers are now required.

Barriers:

The energy of running water has been exploited for very many years. However, traditional approaches have suffered disadvantages due to environmental factors. For example:

- Building a dam across a river floods the land that would otherwise be available for use, alters the landscape, affects the local community that would have lived and worked on the flooded land, alters the character of the river, and prevents the free movement of fish;
- Diverting a river affects the nature of the countryside and does not lend itself to use on a large scale.
- Permanent complete or partial blockage of a river for energy conversion is adversely affected by variations in flow.
- Building large-scale hydro power plants can be polluting and damaging to surrounding ecosystems. Changing the course of waterways can also have a detrimental effect on human communities, agriculture and ecosystems further downstream.
- Hydro projects can also be unreliable during prolonged droughts and dry seasons when rivers dry up or reduce in volume.

TECHNOLOGY & PROCESS:

We have over the years, grown into a complete “In House” outfit capable of providing turnkey solutions in the Infrastructure based Projects with specialization in the development of Small and Medium Hydro Power Projects, High Voltage Electricity Transmission and Distribution (T&D) including concept, design, engineering, erection, commissioning and provisioning of Technical Consultancy services in related areas.

We further intend to improve its efficiency skills, adopting current technology available in the market, upgrading our inventory of equipment, focusing on the safety measures at the Project sites and by way of sponsoring its personnel to attend the higher courses offering modern techniques and study.

Hydro Technology:

Engineering for a small scale hydro project implementation includes determining technology and the designs that are well matched for the head, flow and other characteristics of the water source - dam based or the Run of the River (ROR) scheme and requires skillful execution of a variety of interrelated services and disciplines.

Selection of the right hydro mechanical equipment largely factors to the efficiency of a hydro plant. Similarly, detailed study of the hydrology (rain fall data of the region) play a pivotal role in finalizing the hydro equipment.

The Company has adopted state of the art technology in executing Daman Ganga Small Hydro Projects with capacity of 3 MW (SHP I) and 2.56 MW (SHP II) in Distt. Valsad, Gujarat.

The SHP I showcase marvelous civil / structural engineering as the construction of the Power House required some of the major challenges due to space constraints (sandwiched between Dam structures) and water pooling during monsoon.

Our structural engineers ensured that the design of the Power House satisfy the crucial water tight criteria under submergence conditions, conforming to safety norms and taking into account massive loads conditions (likely to be created by vibration from the generators and the turbines) as well as safety of the existing Dam Structure.

Our team is well versed with the latest software such as **Safi 3D** (a robust and reliable structural software designed with the latest technological innovations) and **Adina** (a Program used for the stress analysis of solids (2D and 3D) and structures in statics and dynamics) as well as working on **AutoCAD 3 D Max**.

Transmission & Distribution (T&D)

We have on our roll, a specialized man power referred as “Gang” required to carry out erection of Transmission & Distribution (T&D) works. Thus, least dependency on out sourcing labor and without depending on engagement of sub-contractors ensuring smooth flow and timely completion of works marking a clear edge over other competitors in the specialized field.

The company has arrangements for designing, manufacturing and proto type testing of special galvanized **Transmission Towers** (High / Low voltage) confirming to design requirements. The towers are usually steel lattices and the insulators are either glass or porcelain discs or composite insulators using silicone rubber attached to long rods whose lengths are dependent on the line voltage and environmental conditions.

The **ACSR (Aluminum Conductor Steel Reinforced) Conductors** or in general term - **Overhead Transmission Line** is used for power evacuation consist of a solid or stranded steel core surrounded by strands of aluminum. The higher strength ACSR conductors are used for stringing of extra-long spans involving railway tracks, river crossing or busy intersections.

The company adheres to strict safety norms based on the guidelines laid by the Industrial Safety law. It is mandatory to wear crash helmets and safety shoes while at Site to ensure full safety. While working on the live wires, a tag is placed on the switch that turns the equipment on and off so that anyone approaching it knows the status while maintenance is being done. Fire extinguishers are placed within reach to ensure that it can be reached quickly in the event of a fire.

The company possesses strong inventory of construction equipment and tools and tackles required for T&D Projects.

The Company has a well-established back up of reputed vendors like M/s ABB, M/s Delton, M/s Crompton Greaves, M/s Hindustan Cable M/s Kirloskar to name few, all leaders in their respective fields for outsourcing of equipment / materials.

The Company has the privilege of gaining tremendous knowledge and sharing modern technology with Spanish giants - M/s Isolux and M/s Cobra on larger platform.

Business Strategy:

Our strategy is to build upon our competitive strengths and business opportunities to become one of the vital Engineering companies foraying in to hydro power, infrastructure, transmission & distribution. We intend to achieve this by implementing the following two pronged strategies:

➤ **Picking up Turnkey Projects in T & D by way of competitive bidding and or through negotiations:**

We would like to focus on African continent as it has abundance of natural resources leading to extensive mining activities involving continuous need of power. The region being power deficient, there are tremendous amount of opportunities for impending power infrastructure works.

We have bid for various T & D Projects which are under review and a few under active consideration with the concerned Government Agencies / State Power Companies in Africa, as mentioned below:

- a) Copper Belt Energy (CEC) - Zambia
- b) Zimbabwe Electrical Supply Authority (ZESA) - Zimbabwe
- c) Electric Company of Ghana (ECG) - Ghana
- d) Power Holding Company of Nigeria (PHCN) - Nigeria
- e) Zambia Electricity Supply Company (ZESCO) - Zambia
- f) Lesotho Electrical Company (LEC) - Lesotho
- g) Tanzania Electricity Supply Company (TANESCO) - Tanzania

In the domestic sector, the company has been pitching for contracts independently as well as taking up sub contracts/ back to back contract in as many as geographical locations as possible.

➤ **By utilizing our experience by way of providing technical consultancy services and picking up assignments for preparation of the Feasibility Reports / Detailed Project Reports for prospective Projects(s).**

COLLABORATIONS

The Company has so far not entered into any technical or financial collaboration agreement.

UTILITIES

Power

For our projects, requirement of power is met with electricity supply provided by our clients.

Manpower

As on 31st December, 2013, we employed approximately 76 persons.

Competition

We operate in highly competitive businesses. Our contracts are entered into primarily through a competitive bidding process and certain contracts are entered into on the basis of negotiations with the client. Our competition varies depending on the size, nature and complexity of the project and on the geographical region in which the project is to be executed. We compete against various multinational and national companies as well as regional organized and unorganized entities. In selecting contractors for projects, clients generally limit the tender to contractors they have pre-qualified based on technical and financial criteria, such as experience, technical ability, past performance, reputation for quality, safety record, financial strength and the size of previous contracts executed in similar projects with them or otherwise. Our ability to meet the qualification criteria in our various business areas is critical to being considered for any project. Additionally, while these are important considerations, price is a major factor in most tender awards and in negotiated contracts and our business is subject to intense price competition. Our competitors may be larger and may have better access to financial resources. Some of our competitors may be better known in regional markets in which we compete. Our inability to compete successfully in the businesses in which we operate could materially and adversely affect our business prospects and results of operations.

Marketing Arrangement

Our track record of timely completion of projects itself provides us the repetitive orders from our existing clientele base. Further we have our dedicated team who keeps track of new contracts being awarded in the industry and follow up for the procurement of the engineering and consultancy operations by showcasing our growth in the industry. We keep constant touch with the power generation entities and infrastructure companies all over India through our team of representatives headed by projects managers.

KEY INDUSTRY REGULATIONS AND POLICIES

The following description is a summary of the relevant regulations and policies as prescribed by the Government of India, State Government and the respective bye laws framed by the local bodies, and others incorporated under the laws of India.

The information detailed in this chapter has been obtained from the various legislations and the bye laws of the respective local authorities that are available in the public domain. The regulations and policies set out below are not exhaustive and are only intended to provide general information to the investors and are neither designed nor intended to be a substitute for professional advice.

Law Relating to Power Industry

The Electricity Act, 2003 (“Electricity Act”)

The Electricity Act was enacted by the Gol to consolidate the laws relating to generation, transmission, distribution, trading and use of electricity and the development of the electricity industry, promoting competition therein, protecting interest of consumers, rationalization of the electricity tariff, and ensuring transparent policies regarding subsidies. The Electricity Act repealed the Indian Electricity Act, 1910 (which governed the transmission, supply and use of electricity), the Electricity (Supply) Act, 1948 (which constituted statutory bodies at the central, regional and state levels to govern generation, transmission and distribution of electricity) and the Electricity Regulatory Commissions Act, 1998 (which constituted the Central and State Electricity Regulatory Commissions). The provisions of the Electricity Act came into force w.e.f. June 10, 2003 and apply to the whole of India excluding the State of Jammu and Kashmir, which has its own State legislation. In addition, it was notified that State enactments be applicable in the respective States to the extent such enactments are not inconsistent with the provisions of the Electricity Act. The Gol amended certain provisions of the Electricity Act by enacting the Electricity (Amendment) Act on January 27, 2004 and June 15, 2007.

National Electricity Policy

The National Electricity Policy, as amended (the “NEP”), was notified by the Central Government on February 12, 2005, pursuant to Section 3 of the Electricity Act.

The main objectives of the NEP are as follows:

- providing access to electricity for all households in next five years;
- meeting the power demand fully by 2012, overcoming energy and peaking shortages and creating an adequate spinning reserve;
- providing a supply of reliable and quality power at specified standards in an efficient manner and at reasonable rates;
- increasing per capita availability of electricity to over 1,000 units by 2012;
- establishing the minimum lifeline consumption of 1 unit/household/day by 2012;
- creating a financially and commercially viable electricity sector; and
- Protecting consumers’ interests.

The National Hydro Power Policy, 2008

The National Hydro Power Policy was notified by the Gol, setting out the following objectives: (a) inducing private investment in hydropower development; (b) harnessing the balance hydroelectric potential; (c) improving resettlement and rehabilitation; and (d) facilitating financial viability. The salient features of this policy are set forth below:

- (a) The existing dispensation available to the public sector regarding exemption from tariff based bidding up to January 2011 is extended to private sector hydroelectric projects;
- (b) State governments would be required to follow a transparent procedure for awarding potential sites to the private sector;
- (c) The concerned private developer would be required to following the existing procedure, including getting the DPR prepared, obtaining concurrence of the CEA/State government, obtaining environment, forest and other statutory clearance and then approach the appropriate regulator. It would be obligatory for the developers to go

through an International Competitive Bidding process for award of contract for supply of equipment and construction of the project either through a turnkey contract or through a few well defined packages;

(d) Tariff of the project would be decided by the appropriate Regulatory commission;

(e) Special incentive for merchant sales of up to 40% of the saleable energy is envisaged for the project(s) meeting the time lines;

(f) An additional 1% free power from the project would be provided and earmarked for Local Area Development Fund, aimed at providing a regular stream of revenue for income generation and welfare schemes, creation of additional infrastructure and common facilities on a sustained and continued basis over the life of the project. It is further recommended that the host State government would also provide a matching 1% from their share of 12% free power towards this corpus fund. This fund could be operated by a standing committee headed by an officer of the State government not lower than a district magistrate;

(g) For 10 years from the date of commissioning of the project, 100 units of electricity per month would be provided by the project developer to each project affected family through the relevant distribution company;

(h) In the interest of speedy implementation of hydroelectric projects, it is proposed that the Resettlement and Rehabilitation package should be more liberal than the National Resettlement and Rehabilitation Policy, 2007.

Environment Laws

Environment (Protection) Act, 1986

The Environment (Protection) Act, 1986 was enacted as a general legislation to safeguard the environment from all sources of pollution by enabling coordination of the activities of the various regulatory agencies concerned, to enable creation of an authority with powers for environmental protection, regulation of discharge of environmental pollutants etc. The purpose of the Act is to act as an "umbrella" legislation designed to provide a frame work for Central government co-ordination of the activities of various central and state authorities established under previous laws, such as Water Act & Air Act. It includes water, air and land and the interrelationships which exist among water, air and land, and human beings and other living creatures, plants, micro-organisms and property.

The Water (Prevention and Control of Pollution) Act, 1974, as amended (the "Water Act")

The Water Act aims to prevent and control water pollution as well as restore water quality by establishing and empowering the Central Pollution Control Board and the State Pollution Control Boards. Under the Water Act, any person establishing any industry, operation or process, any treatment or disposal system, use of any new or altered outlet for the discharge of sewage or new discharge of sewage, must obtain the consent of the relevant State Pollution Control Board, which is empowered to establish standards and conditions that are required to be complied with. In certain cases the State Pollution Control Board may cause the local Magistrates to restrain the activities of such person who is likely to cause pollution. Penalty for the contravention of the provisions of the Water Act include imposition of fines or imprisonment or both.

The Central Pollution Control Board has powers, inter alia, to specify and modify standards for streams and wells, while the State Pollution Control Boards have powers, inter alia, to inspect any sewage or trade effluents, and to review plans, specifications or other data relating to plants set up for treatment of water, to evolve efficient methods of disposal of sewage and trade effluents on land, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry likely to pollute a stream or a well, to specify standards for treatment of sewage and trade effluents, to specify effluent standards to be complied with by persons while causing discharge of sewage, to obtain information from any industry and to take emergency measures in case of pollution of any stream or well.

A central water laboratory and a state water laboratory have been established under the Water Act.

Intellectual Property Laws:

Copyright Act, 1957

The Copyright Act, 1957 governs the law relating to copyright in India and defines infringement and provides remedies for the same. Copyright means the exclusive right to do or authorize others to do certain acts in relation to original (1) literary, dramatic or musical works, not being a computer programme, (2) computer programme, (3) artistic work, (4) cinematograph film and (5) sound recording. The object of copyrights is to protect the author

of a copyrighted work from any unlawful reproduction or exploitation. Copyright subsists during the life of the author/creator of the work and 60 years thereafter in case the author is a natural person. In all other cases, copyright subsists for 60 years from the date of publication of the work concerned.

Trade Marks Act, 1999

The Indian law on trademark is enshrined in the Trade Marks Act of 1999. Under the existing Act, a trademark is a mark used in relation to goods and/or services so as to indicate a connection between the goods or services being provided and the proprietor or user of the mark. A 'Mark' may consist of a word or invented word, signature, device, letter, numeral, brand, heading, label, name written in a particular style, the shape of goods other than those for which a mark is proposed to be used, or any combination thereof or a combination of colours and so forth. The trademark once it is applied for is advertised in the trademarks journal, oppositions, if any, are invited and after satisfactory adjudication of the same, is given a certificate of registration. The right to use a mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is ten years, which may be renewed for similar periods on payment of prescribed renewal fees.

Labour Laws:

Employees Provident Fund and Miscellaneous Provisions Act, 1952

Employees Provident Funds and Miscellaneous Provisions Act, 1952 ("EPFA") was introduced with the object to institute compulsory provident fund for the benefit of employees in factories and other establishments. The EPFA provides for the institution of provident funds and pension funds for employees in establishments where more than 20 persons are employed and factories specified in Schedule I of the EPFA. Under the EPFA, the Central Government has framed the "Employees Provident Fund Scheme", "Employees Deposit-linked Insurance Scheme" and the "Employees Family Pension Scheme". Liability is imposed on the employer and the employee to contribute to the funds mentioned above, in the manner specified in the statute. There is also a requirement to maintain prescribed records and registers and filing of forms with the concerned authorities.

A qualifying asset is one that takes necessarily substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

Tax expenses for the year comprise of current tax and deferred tax. Current tax is measured after taking into consideration the deductions and exemptions admissible under the provision of Income Tax Act, 1961.

INDUSTRY OVERVIEW

Overview of Consultancy Services in India

Consultancy is a practice of giving expert advice within a particular field by professionals or experts who advice in a particular area and has wide knowledge, well experienced, problem solving skill and is expertise of the subject matter.

- **Construction Consulting**

Construction consulting is a specialized form of business consultation that focuses on all forms of construction, most notably building construction. When companies, especially large ones, need to build new installations and factories, they need conceptual planning, phasing, sequencing, and construction services.

- **Engineering Consulting -**

A city might need a new bridge across a river, for which design and building plans would be required, a new factory with multiple automated assembly lines might need to be constructed, an engine might need to be designed for a new aircraft, or a helipad might need to be built atop a 100-storey building. Engineering Consultants would be employed for such assignments.

The Indian Infrastructure Opportunity

The Indian economy is based on planning through successive five year plans that set out targets for economic development in various sectors, including the infrastructure sector. The XIth Five Year Plan ("FYP") aims at a sustainable GDP growth rate of 9.00%, but there is general consensus that infrastructure inadequacies would constitute a significant constraint in realizing this development potential. To overcome this constraint, an ambitious programme of infrastructure investment, involving both public and private sector, is being developed for the XIth FYP. Infrastructure spending targets for the XIth FYP were revised from approximately 4.60% to approximately 7.60% of GDP representing an increase of over 140.00% compared to the Xth FYP.

Overview of the Indian Power Sector

The power sector in India is slowly moving from a regulated return framework to a market driven pricing mechanism. This has provided a major boost for private entrepreneurs to enter the power sector and set up projects. Currently significant traction has been achieved in the generation space, while the transmission and the distribution segment is slowly opening to the private sector. (Source: Ministry of Power).

HYDROPOWER

Hydropower is a renewable energy resource because it uses the Earth's water cycle to generate electricity. Water evaporates from the Earth's surface, forms clouds, precipitates back to earth, and flows toward the ocean. The movement of water as it flows downstream creates kinetic energy that can be converted into electricity. 2700 TWH is generated every year. Hydropower supplies at least 50% of electricity production in 66 countries and at least 90% in 24 countries. Out of the total power generation installed capacity in India of 1,76,990 MW (June, 2011), hydro power contributes about 21.5% i.e. 38,106 MW. A capacity addition of 78,700 MW is envisaged from different conventional sources during 2007-2012 (the 11th Plan), which includes 15,627 MW from large hydro projects. In addition to this, a capacity addition of 1400 MW was envisaged from small hydro up to 25 MW station

capacity. The total hydroelectric power potential in the country is assessed at about 150,000 MW, equivalent to 84,000 MW at 60% load factor. The potential of small hydro power projects is estimated at about 15,000 MW.
